1901-1902

Announcements For 1902-1903.

1902.		
SEPTEMBER	9, TUESDAY	The Fall Term Begins.
NOVEMBER	27, THURSDAY	Thanksgiving Holiday.
	28, FRIDAY	The Fall Term Ends.
	THE WINTER RECESS.	
DECEMBER	1, MONDAY	The Winter Term Begins.
	24, 25, WEDNESDAY, THURSDAY	Christmas Holidays.
1903.		
JANUARY	1, THURSDAY	New Year's Holiday.
	4, SUNDAY	Week of Prayer Begins.
	30, FRIDAY	Armstrong Memorial Exercises.
FEBRUARY	18, WEDNESDAY	Tuskegee Negro Conference.
	19, THURSDAY	The Workers' Conference.
	27, FRIDAY	The Winter Term Ends.
	THE SPRING RECESS.	
MARCH	2, MONDAY	The Spring Term Begins.
APRIL	24, FRIDAY	Night School Students' Holiday.
MAY	24, SUNDAY	The Baccalaureate Sermon.
	25, MONDAY	Phelps Hall Bible Training School Exercises.
	26, TUESDAY	Trinity Church Boston Prize Contest.
	27, WEDNESDAY	Exercises of the Agricultural and Mechanical Departments.
	28, THURSDAY	Commencement Day.

Board of Trustees.

MR. GEORGE W. CAMPBELL, President,	Tuskegee, Ala.
REV. G. L. CHANEY, Vice-President,	Leominster, Mass.
REV. R. C. BEDFORD, Secretary,	Beloit, Wis.

------------------------	----------

* Part of Term.

**General Statement.****LOCATION.**

Tuskegee is situated near the center of the State of Alabama, and is one of the most beautiful towns in it, with a population of cultivated and generous people. The school is one mile from the town, upon a site overlooking all of the adjacent territory. The scenery about it is not surpassed, if equalled, in the whole South. The climate is salubrious and unsurpassed for healthfulness. Tuskegee is forty miles east of Montgomery, and five miles from Chehaw Station, on the line of the Western Railway of Alabama, with which it is connected by the Tuskegee Railroad. It is but one hundred and thirty-six miles west of Atlanta. While it enjoys all of the advantages of access that a large city does, it is, at the same time, far enough removed from the main line of travel to make it free from the danger of contagious diseases. The Western Union and the Postal Telegraph Companies, and the Southern Express Company, have offices in the town.

ESTABLISHMENT.

The institution was established under the name of the Tuskegee State Normal School, by an act of the Alabama Legislature, session of 1880, appropriating Two Thousand Dollars. The institution was opened, for its first session, July 4, 1881, in a rented shanty church, with thirty pupils in attendance, and with but one teacher. In 1883, the appropriation was increased to Three Thousand Dollars, and in 1893, the institution was incorporated under the name of the Tuskegee Normal and Industrial Institute. During the first session of the school, the present location, consisting at that time of one hundred acres, with three small buildings thereon, was purchased by Northern friends.

PROPERTY AND ITS PRESENT VALUATION.

The property immediately belonging to the school consists of 54 buildings, 2,500 acres of land, 800 head of live stock, and more than 50 wagons, carriages and vehicles of various kinds. The valuation is fully \$400,000. Three new buildings are at this time in process of erection. In 1899, the National Congress granted to

HUNTINGTON HALL, GIRLS' DORMITORY.

the school 25,000 acres of mineral land, the probable proceeds from which will be \$125,000, and are to be used for endowment purposes. This amount added to the present Endowment Fund, makes the endowment of the institution about \$400,000. Thus, the total value of property, equipment, and endowment, is in the neighborhood of \$800,000.

OBJECT.

The object of the Tuskegee Institute is to furnish to young colored men and women an opportunity to acquire thorough moral, literary and industrial training, so that when they go out from Tuskegee, by putting into execution the practical ideas learned here, they may become the real leaders of their communities, and thus bring about healthier moral and material conditions. The institution also aims, through the Phelps Hall Bible Training School, to better fit young men and women for the ministry and for other forms of Christian work.

The constant aim is to so correlate the literary and industrial training, that a student cannot get the one without the other.

BUILDINGS.

PORTER HALL.—Porter Hall is a three-story, frame building, with a basement. It was the first building erected after the school was opened, and contains the offices of the Principal, Treasurer, Head Book-keeper, and Director of the Academic Department. There is also an assembly room and a number of recitation rooms in Porter Hall.

OLIVIA DAVIDSON HALL.—This is a three-story, brick structure, the greater part of which is used for dormitory purposes for young men. It also contains recitation rooms and the office of the Commandant of Cadets.

SCIENCE HALL.—Science Hall is a handsome, three-story brick building, with recitation rooms and well equipped physical and chemical laboratories on the first floor, recitation rooms on the second floor, and sleeping rooms for young men in the third story. It is one of the best arranged buildings on the grounds, and well suited for present uses.

CASSEDY HALL.—The Mechanical Industries formerly occupied this building, but all of these have been transferred to the Trades' Building. Cassidy Hall is now used as a dormitory for young men. A large sum of money has recently been spent in transforming it into a nicely arranged dormitory.

ALABAMA HALL.—The Lady Principal, many of the lady teachers and most of the girls, have their rooms in Alabama Hall. The

dining room for both teachers and students, and the bakery, are in this building. Alabama Hall is a substantial, four-story brick structure. Near it are Hamilton Cottage and "The Annex," both used for dormitory purposes for the girls and lady teachers.

HUNTINGTON HALL is the gift of Mrs. C. P. Huntington. It contains twenty-three rooms, with basement and attic, and is also used as a girls' dormitory. It is built of brick, and is two stories high.

The Phelps Hall Bible Training School Building, The Slater-Armstrong Memorial Trades' Building, The Slater-Armstrong Memorial Agricultural Building, the Hospital, Dorothy Hall, The Children's House and the Carnegie Library are described in detail elsewhere in this catalogue.

NOTE.—There is a number of less important buildings, of which no mention is made.

Rockefeller Hall to be used as a boys' dormitory, an Office Building and two bath houses, one for young men and the other for young women, are now being erected. An additional girls' dormitory building will also be begun as soon as possible.

THE LIBRARY.

For the past two years, the building formerly occupied by the Principal as a residence, has been used as a library and reading room. It is open from 7 a. m. to 8 p. m., and is at all times under the supervision of a competent librarian. Unfortunately the institution has no specific fund from which to appropriate for the purchase of books; almost every volume in the library has been received as a donation from friends. Students in all departments are encouraged to use the library and reading room for all helpful purposes, and are furnished all needed assistance in their work. Liberal privileges are permitted to both students and teachers in taking out books for use in their rooms.

An effort is being made to get hold of every pamphlet and book of every description written by a Negro, the purpose being to make Tuskegee a centre of information regarding Negro literature. Many Negro authors, to whom application has been made, have gladly contributed a copy of their work. The more important magazines, newspapers and technical journals may be found regularly on the tables of the reading room. During the present year all the books have been re-catalogued, preparatory to moving into the new Library Building, given by Mr. Andrew Carnegie.

The Carnegie Library is a splendid brick structure, built on the colonial style of architecture, and cost \$20,000. The four

Ionic columns on the front, support a well designed pediment which forms the porch, and give the building a very imposing appearance. In its greatest dimensions, the building is fifty by one hundred and ten feet, and two stories high. In plan, it contains a central part, flanked on the east and west sides by wings, thirty by forty feet. The first floor contains a stack room, reading room, librarian's office, janitor's room, and two rooms used for the magazines and newspapers. On the second floor there are an assembly room, which seats two hundred and twenty-five persons, a stack room, three study rooms, and a museum. The whole building is heated by steam and lighted by electricity. Speaking tubes and other fixtures of a well appointed library, have been generously provided.

LITERARY SOCIETIES.

The young men of the institution maintain six Literary and Debating Societies: The Natural History Debating Club, composed exclusively of young men in the Agricultural Department; The Stokes Ministers Union, whose members attend the Bible Training School; The Tailors' Union, with a membership drawn from the Division of Tailoring; The Willing Worker's Debating Club, The Union Debating Society and the Liberty Debating Club, all three of which are open to any of the young men. The meetings are held every Saturday night. Representatives of these societies meet annually in joint public debate.

The young women have the Harriet Beecher Stowe Literary Society, composed of the young women in the three upper classes of the Normal Department.

RELIGIOUS EXERCISES.

Students are required to attend Sunday School and Church services regularly every Sunday. There are among the students four religious organizations and societies: The Young Men's Christian Association, Young Peoples' Society of Christian Endeavor, The Young Women's Christian Temperance Union, and The Edna D. Cheney Missionary Society. Although Tuskegee is primarily a Normal and Industrial Institute the religious side of its work is not neglected or slighted.

CHAPEL EXERCISES.

Teachers and students assemble in the Institute Chapel every evening at 8:20 o'clock, immediately following the night school recitations for devotions. The exercises consist of reading of the Scriptures or other selection by the Principal, or some

member of the faculty, announcements and singing. When prominent visitors are in attendance they are requested to address the students and teachers at this service.

SCHOOL PUBLICATIONS.

The Tuskegee Student is a weekly newspaper, devoted to the interest of the students and graduates of the institution.

The Southern Letter is a monthly journal, containing a record of the achievements of the graduates of the institution and goes more particularly to philanthropic persons throughout the country.

GYMNASTICS FOR YOUNG WOMEN.

Especial attention is given at Tuskegee to gymnastics for young women. The object is to counteract the evils resulting from habitually incorrect positions, to improve the general carriage, bring about healthy respiration and circulation and to tone up the whole body.

The free standing movements of the Swedish or Ling system are followed. The work embraces all the fundamentals of gymnastics: bending, twisting, stepping, marching and breathing. The instructor in charge comes from the Boston Normal School of Gymnastics.

Gymnastics among the young men comes in connection with their military drill and is under the supervision of the Commandant of Cadets.

MILITARY TRAINING FOR YOUNG MEN.

The military system has been introduced for the reason that it cultivates habits of order, neatness and unquestioned obedience. Besides, the drill is good physical training, promoting, as it does a manly bearing. "Setting-up" exercises according to the very latest methods used in the United States Army have been introduced. No guns are used.

The Battalion is composed of four day school companies of about seventy members each, and about the same number from the Night School. The companies are officered by students, who are commissioned by the Institute Commandant. The day school companies form each week day morning, before the school session.

General Regulations.

ADMISSION OF STUDENTS.

APPLICATIONS—Persons desiring to enter the institution should satisfy themselves before leaving home, either by writing to the Principal or by consulting the catalogue, that they are able in every way to meet the requirements for admission. All applicants for admission should make application direct to the Principal, and he will notify such persons if their applications are accepted. A catalogue will be sent to any one who will send five cents for postage.

Upon arrival at the school, applicants should present themselves at the Principal's office for examination.

Students are expected to enter promptly at the beginning of the session and remain until the close.

REQUIREMENTS—No person will be admitted to the school as a student who cannot pass examination for the C Preparatory class. To enter this class one must be able to read, write, and understand addition, subtraction, multiplication, and division.

THE DAY SCHOOL—For admission to the Day School applicants must be of good moral character and must bring at least two letters of recommendation from reliable persons in their communities.

They must also be 14 years of age, of good physique and able to pass the examination for the C Preparatory class, as stated above.

The Day School is intended for those students who are able to pay all or the greater part of their expenses in cash. They attend school in the day time four days each week and are required to work only six days in the month—one school day in each week and every other Saturday.

THE NIGHT SCHOOL—Requirements for entering the Night School are the same as for admission to the Day School with the following additional requisites: Applicants must be 16 years of age instead of 14 and physically able to perform an adult's labor. Cripples are, under no circumstances, admitted to this Department.

The Night School is designed for young men and women who earnestly desire to educate themselves, but who are too poor to pay even the small charge made in the Day School. Students will not be admitted to the Night School who are known to be able to enter the Day School, and when a student has fraudulently gained admission, upon the discovery of the deception, he must either enter the Day School or leave the institution.

Trades are assigned as nearly as possible in accordance with the students' desires. In assigning young men and women to trades their mental ability and intelligence to grasp it, and physical ability to perform the duties required, are all carefully considered. At the beginning of the school year it often happens that certain of the industries are quickly filled; and when this happens, applicants for this particular industry are assigned to some other division until a vacancy occurs.

EXPENSES.

The necessary expenses of a student at Tuskegee are quite low. It is intended, so far as possible, that no diligent, worthy student shall leave the institution for lack of means.

Tuition is free to all students.

Entrance fee.....	\$2.00
Board per month, including furnished room, laundering, lights, fuel, etc.....	\$8.00
Books, estimated cost for different classes:	
Junior Class.....	\$4.00
B Middle Class.....	\$4.80
A Middle Class.....	\$6.75
Senior Class.....	\$6.25

The C and B Preparatory classes \$2.00 each; A Preparatory, \$3.20. The Entrance fee and the cost of books must be paid in cash.

Day School students are given an opportunity to work out from \$1.50 to \$3.00 per month on their board, thus leaving from \$5.00 to \$6.50 to be paid in cash. The labor of students must be satisfactory in order to be accepted as part payment for board. Economical, enterprising students rarely fail to remain in school, some of them working out as much as half of their board. It should, however, be understood that the institution does not guarantee that a student shall work out a stipulated amount. The amount varies according to the value of work done and the diligence with which the student applies himself,

When students do not settle their accounts by the fifteenth of each month, they are liable to suspension from their classes until the accounts are paid. For this reason it is especially urged that parents endeavor to pay students' accounts promptly; for while a student is thus suspended he is required to work for his board, and falling behind in his classes, becomes discouraged and unfit for school duties generally.

With a good outfit of clothing, \$45.00 or \$50.00 in money is sufficient to carry an industrious student through a term of nine months in the Day School.

Night School students, except those in the Tailoring, Shoe-making and Sewing divisions, as a rule, are allowed to work out at least all of their board for the first six months, and after that the rate of wages depends on the amount of work a student can perform and the cash value of same. As the student increases in proficiency the rate of wages is increased proportionately.

No student is paid more than \$12.00 per month in excess of his board and no part of a student's wages is paid in cash, except that those who work at Marshall Farm are permitted to draw \$2.00 per month. Whatever a Night School student may earn in excess of board is placed to his credit on the Treasurer's books to be used for his expenses after he enters the Day School. In SPECIAL CASES, students are permitted to draw on their accounts by orders for books, clothing, etc.

For Expenses in Bible School, see Phelps Hall Bible Training School.

CLOTHING.

GIRLS—It is of the greatest importance that girls be properly clothed; not only for the preservation of their health but also to aid in teaching them economy and correct ideas of dressing.

Each girl must bring good shoes, a pair of rubber overshoes, and a water-proof rain coat. Warm and comfortable underclothing, woolen if possible, should be provided for the winter season. The institution cannot be responsible for the health of girls when they are not properly clothed.

Young women are required to wear a braided navy blue, sailor, uniform dress and a plain sailor hat. They need no other dresses or hats while connected with the school.

The cost of the uniform dress is from \$2.00 to \$4.00, according to the season; the hats, \$1.50.

It is also expected that girls in the Day School will provide themselves with gymnastic suits,

Boys—All young men students are required to have a school uniform which consists of a coat, pants and military cap. The color of the uniform is dark blue and may be purchased at the school's Tailor shop at the bare cost of material and making.

Parents are requested not to buy new suits and new dresses for their sons and daughters, but to save their money with which to purchase uniforms.

The cost of uniform for young men is:

Coat.....	\$6.00
Pants.....	4.50
Cap.....	1.00

Students must furnish their own towels and soap.

DISCIPLINE.

The rules governing the school are aimed to be those which best promote the welfare and happiness of all.

Each student is required to have a Bible.

Each student should come provided with table napkins.

Regular habits of rest and recreation are required.

No student is allowed to leave the grounds without permission.

Male students, when permitted to leave the grounds, must wear the regulation cap.

No young woman is permitted to leave the grounds of the Institute unless accompanied by a lady teacher.

The Institute has adequate facilities for bathing, and all students are required to bathe at stated periods.

The use of intoxicating drinks and the use of tobacco are strictly forbidden.

Dice-playing and card-playing are positively prohibited.

Students are not permitted, while in school, to take part in any political mass-meeting or convention.

Students are liable to be dropped for inability to master their studies, irregularity of attendance, or for any failure to comply with the regulations of the school after due notice.

The demeriting system has been adopted by the school as the principal method of discipline for misconduct; $3\frac{3}{8}$ demerit marks constitute a "warning," and upon receiving three warnings, a student is liable to suspension or expulsion, according as the Executive Council may determine.

All non-resident students are expected to board at the school, unless there is some good reason for a contrary arrangement.

Students are not registered for a shorter period than one month; those who leave before the end of a month are charged for a full month's board.

When students desire to leave the school, they are required to have their parents or guardians write directly to the Principal for permission to do so.

Students who sign a contract to work a specified time at some trade or other work, must be released from their contract before an application for an excuse from school will be considered. Any student leaving without a written excuse will not be allowed to return, and students under contract will not only be dismissed but will forfeit whatever cash there may be to their credit in the treasury. Students must settle their accounts before leaving school.

Remittances in payment of bills should be made to the Principal or Treasurer, and not to the student, by Postoffice Money Order, Registered Letter, or Check.

Students are not allowed to retain firearms in their possession. The Commandant of Cadets will retain and give receipts for any brought.

Low or profane language will subject a student to severe discipline. Students are liable to reprimand, confinement or other punishment.

Letter writing is subject to regulation, and all mail and express packages are inspected and contents noted. Students are urged to write their parents at least once a week.

Wardrobes and rooms of students are subject to inspection and regulation, by proper officers, at all times, and regular and thorough inspection of the same are made from time to time.

VACATION AND HOLIDAYS.

The school term begins on the second Tuesday in September and closes the last Thursday of the following May. Legal and special holidays are observed. Further information, if desired, will be gladly furnished by the Principal.

SCIENCE HALL.

The Academic Department.

The special aim of the department, while helping in the development of efficient workmen and skilled artisans, is to make teachers in the truest sense of the term—to enable the student to apply with judgment the knowledge gained in the class to the working out of concrete problems, both in the work shop and the school room, or in whatever his chosen field of labor.

The work of the department is preparatory and normal—of three and four years, respectively. The preparatory years afford a necessary and thorough drill in the elementary English branches for those who come unprepared for the more difficult normal work.

The department aims to make the normal work instructive and practical. The methods of correlation afford both to teacher and student a most excellent opportunity to get the broader, keener, and more practical view of the problems and principles of education.

The last year of the normal course is given very largely to elective studies, the student being guided in his selection by the special trade, or professional work, to which he has devoted his previous years of school work, and which he intends to follow after completing his course. He thus has a splendid opportunity to develop along the lines of his chosen profession.

There is also a night division of the work, differing from the day, only in allowing the student to work during the day and take his lessons at night, and so arranged to meet the wants of those who wish to give early and special attention to trade work, while at the same time acquiring an education.

NORMAL COURSE OF STUDY, SENIOR CLASS; FALL TERM.

MIND STUDY.—Special Subjects relating to work in Pedagogy.

†**CHEMISTRY.**—Qualitative Analysis.

PHYSICS.—Mechanics; the Atmosphere.

‡**GEOMETRY.**—Rectilinear figures; Parallel lines; Quadrilaterals; Circles.

DRAWING.—See Course in Drawing.

†Elective.

PRACTICAL ARITHMETIC.

ENGLISH.—Grammar and Analysis of "Vision of Sir Launfal," Lowell; Composition; Letter-writing; Memorizing Choice Selections.

WINTER TERM.

MIND STUDY.—Special Subjects relating to work in Pedagogy.

†CHEMISTRY.—Practical application of Qualitative Analysis to Soils, Water, etc.

PHYSICS.—Light; Sound.

†GEOMETRY.—Ratio and Proportion; Similar Figures; Areas of Polygons; Regular Polygons.

DRAWING.—See Course in Drawing.

ENGLISH.—Grammar and Analysis of "Julius Cæsar," Shakespeare; Composition; Letter-writing; Memorizing Choice Selections.

SPRING TERM.

MIND STUDY.—Special Subjects relating to work in Pedagogy.

†CHEMISTRY.—Industrial Chemistry.

PHYSICS.—Heat; Magnetism; Electricity.

†GEOMETRY.—Solid Geometry—Planes, Angles, Cylinders, Cones, Polygons.

DRAWING.—See Course in Drawing.

ENGLISH.—Grammar and Analysis of "The Lady of the Lake," Scott; Composition; Letter-writing; Memorizing Choice Selections.

A MIDDLE CLASS; FALL TERM.

ENGLISH.—The Grammar and Analysis of "The Great Stone Face," Hawthorne; Composition; Letter-writing; Memorizing Choice Selections.

ALGEBRA.—Introduction and Fundamental Processes.

CHEMISTRY.—The Metallic and Non-Metallic Elements, with Experiments.

PEDAGOGY.—Education; Educational Reformers; Current Educational Literature.

WINTER TERM.

ENGLISH.—The Grammar and Analysis of "Snow-bound," Whittier; Composition; Letter-writing; Memorizing Choice Selections.

ALGEBRA.—Factoring; Fractions.

CHEMISTRY.—Organic Compounds by Experiments.

PEDAGOGY.—Child Study; Methods; Current Educational Literature.

†Elective.

SPRING TERM.

ENGLISH.—Grammar and Analysis of "The Deserted Village," Goldsmith; Composition; Letter-writing; Memorizing Choice Selections.

ALGEBRA.—Simultaneous Equations; Involution; Evolution; Theory of Exponents: Radical Quantities; Quadratics.

BUSINESS TRAINING.—Book-keeping; Business Correspondence; Writing letters requiring Remittances; Enclosures, etc.

PEDAGOGY.—Organization; Management; Current Educational Literature.

B MIDDLE CLASS; FALL TERM.

ARITHMETIC.—Oral and Written—Review Decimals; Fundamentals of Percentage; Gain and Loss; Commission; Insurance; Taxes.

GRAMMAR.—Oral and Written—Analysis of Complex and Compound Sentences; Composition; Letter-writing; Memorizing Choice Selections.

READING.—American Authors.

U. S. HISTORY.—Periods of Discovery; Colonization.

VOCAL MUSIC.—Junior Work Briefly Reviewed; Lighter Four-part Compositions.

WINTER TERM.

ARITHMETIC.—Oral and Written; Interest Completed; Proportion.

GRAMMAR.—Analysis and Synthesis of Sentences; Parts of Speech Subdivided; Composition; Letter-writing; Memorizing Choice Selections.

*READING.—American Authors—Supplemented.

U. S. HISTORY.—Revolutionary Period; Nationalization.

*PHYSIOLOGY.—Anatomy; Food and Digestion.

VOCAL MUSIC.—Anthems, Glee, etc.; Music History.

SPRING TERM.

ARITHMETIC.—Involution and Evolution; Metric Measurements.

GRAMMAR.—Modifications of Parts of Speech; Analysis; Composition; Letter-writing; Memorizing Choice Selections.

U. S. HISTORY.—Civil War; Reconstruction; National Development.

*Part of Term.

PHYSIOLOGY.—The Circulatory and Nervous Systems; the Senses; Hygiene.

VOCAL MUSIC.—Musical Form; the Study of Some Cantata, Oratorio, or Mass.

JUNIOR CLASS; FALL TERM.

ARITHMETIC.—Oral and Written; Review Fractions; Compound Quantities.

GRAMMAR.—Oral and Written; Analysis; Parts of Speech; Composition; Letter-writing; Memorizing Choice Selections.

READING.—Fifth Reader—Supplemented.

SPELLING.—Word Study; Words Selected.

GEOGRAPHY.—Review North America; Europe.

VOCAL MUSIC.—Rudiments; Part Singing in Keys of C, F, and G.

WINTER TERM.

ARITHMETIC.—Oral and Written; Longitude and Time; Surface Measurements.

GRAMMAR.—Oral and Written Analysis; Parts of Speech; Composition; Letter-writing; Memorizing Choice Selections.

READING.—Fifth Reader—Supplemented.

SPELLING.—Word Study—Words Selected.

GEOGRAPHY.—South America, Asia and Africa.

VOCAL MUSIC.—Formation of the Scales, and Part Singing in Various Keys.

SPRING TERM.

ARITHMETIC.—Oral and Written; Volume Measurements.

GRAMMAR.—Oral and Written; Analysis and Synthesis of Sentences; Modifications of Parts of Speech; Composition; Letter-Writing; Memorizing Choice Selections.

READING.—Fifth Reader—Supplemented.

SPELLING.—Word Study; Words Selected.

GEOGRAPHY.—Review Geography; United States Emphasized.

VOCAL MUSIC.—Singing of Hymn Tunes, Anthems, etc., and Transposition.

PREPARATORY COURSE OF STUDY; A PREPARATORY CLASS; FALL TERM.

ARITHMETIC.—Oral and Written; Practical Problems; Multiples and Measures; Roman Notation.

LANGUAGE.—Oral and Written; Dictation; Copying; Reproduction; Description; Composition; Letter-writing; Memory Gems.

READING.—Fourth Reader, Supplemented.

SPELLING.—Words Selected.

GEOGRAPHY.—United States—Supplemented.

DRAWING.—See Course in Drawing.

WINTER TERM.

ARITHMETIC.—Oral and Written; Common Fractions; Multiplication and Division; Simple practical examples for analysis; Aliquot parts of a Dollar.

LANGUAGE.—Oral and Written; Work of Previous Quarter Continued and Extended (Text Book); Sentences with respect to Meaning; Parts of Speech.

READING.—Fourth Reader, Supplemented.

SPELLING.—Words Selected.

GEOGRAPHY.—Sections of the United States.

DRAWING.—See Course in Drawing.

SPRING TERM.

ARITHMETIC.—Oral and Written; Review Common Fractions; Decimal Fractions; Examples to show relation existing between Common and Decimal Fractions.

LANGUAGE.—Oral and Written; Work of Previous Quarters Continued and Extended; Parts of Speech; Analysis of Simple, Complex and Compound Sentences, limited to Simple Construction.

READING.—Fourth Reader, Supplemented.

SPELLING.—Words Selected.

GEOGRAPHY.—North America.

DRAWING.—See Course in Drawing.

B PREPARATORY CLASS; FALL TERM.

ARITHMETIC.—Oral and Written; Review C Preparatory Work; Division.

LANGUAGE.—Oral and Written Exercises; Conversation; Dictation; Copying; Reproduction; Description; Composition; Memory Gems; Letter-writing, (Text Book).

READING.—Third Reader, Supplemented; Breathing and Vocalizing Exercises.

SPELLING.—Words Selected.

GEOGRAPHY.—The Southern States—Eastern Section.

WRITING.—Copy-book; Vertical System.

DRAWING.—See Course in Drawing.

WINTER TERM.

ARITHMETIC.—Oral and Written; Division Continued.

LANGUAGE.—Oral and Written Exercises; Work of Previous Quarter Continued (Text Book).

READING.—Third Reader, Supplemented; Breathing and Vocalizing Exercises.

SPELLING.—Words Selected.

GEOGRAPHY.—Southern States—Western Section.

WRITING.—Copy-book; Vertical System.

DRAWING.—See Course in Drawing.

SPRING TERM.

ARITHMETIC.—Oral and Written; Application of the four fundamental rules in the Solution of Problems; U. S. Money; Bills and Business Forms.

LANGUAGE.—Oral and Written; Work of Previous Quarter Continued (Text Book).

READING.—Third Reader, Supplemented; Breathing and Vocalizing Exercises.

SPELLING.—Words Selected.

GEOGRAPHY.—General Lessons on the World.

WRITING.—Vertical System; Copy-book.

DRAWING.—See Course in Drawing.

CLASS IN GYMNASTICS.

C PREPARATORY CLASS; FALL TERM.

ARITHMETIC.—Oral and Written; Addition; Simple Business Examples Practically Solved.

LANGUAGE.—Oral and Written Exercises—To give Freedom and Correctness in Oral and Written Expressions; Conversation; Copying; Dictation; Reproduction; Description; Memory Gems; Letter-writing.

READING.—Second Reader, Supplemented; Breathing and Vocalizing Exercises.

SPELLING.—Words Selected.

GEOGRAPHY.—Simple Ideas of the Earth; Study of Neighborhood and City.

WRITING.—Copy-book; Vertical System.

NATURE STUDY.—Lessons on the Human Body, Plants and Animals, Minerals, Natural Phenomena.

WINTER TERM.

ARITHMETIC.—Oral and Written; Subtraction; Rapid Mental Work.

LANGUAGE.—Oral and Written; Exercises of Previous Quarter Continued; (Text Book).

READING.—Second Reader, Supplemented.

SPELLING.—Words Selected.

GEOGRAPHY.—Study of the Country, Supplemented.

WRITING.—Copy-book; Vertical System.

NATURE STUDY.—Lessons on the Human Body, Plants, Animals, Minerals, Natural Phenomena.

SPRING TERM.

ARITHMETIC.—Oral and Written; Multiplication; Drill in Rapid Combination of Numbers Involving Fundamental Rules.

LANGUAGE.—Oral and Written; Work of Previous Terms Continued and Extended; (Text Book).

READING.—Second Reader, Supplemented.

SPELLING.—Words Selected.

GEOGRAPHY.—Study of the State; Supplemented.

WRITING.—Copy-book; Vertical System.

NATURE STUDY.—Lessons on the Human Body, Plants, Animals, Minerals, Natural Phenomena.

BIBLE COURSE OF STUDY FOR ACADEMIC DEPARTMENT.

A Bible Course of Study has been outlined for all of the Academic classes of the institution. Each class recites once a week. The fundamental truths of the Bible should be known by

every one. It is the purpose to have each student that comes to the institution taught these truths, that the conduct of life may be guided thereby, and noble ideals cultivated and cherished. The following is the Course of Study:

1. Senior.—Epistles (selections); Reviews; Gospels and Chronology.

2. A Middle.—Minor Prophets, Gospels and Acts (selections); Review Chronology, Names and Authors; Bible Geography.

3. B Middle.—Poetic and Major Prophetic Books (selections); Review Chronology; Biblical Geography.

4. Junior.—Historical Books (selections); Bible Chronology; Review Names and Authors.

5. A Preparatory.—Numbers and Deuteronomy; Review names and authors.

6. B Preparatory.—Exodus and Leviticus; Review Names and Authors.

7. C. Preparatory.—Genesis; Names and Authors of Books of the Bible.

FREE-HAND DRAWING.

Free-hand Drawing, for the A and B Preparatory and Junior and B Middle classes, is conducted under the direction of the Academic Department, and is designed to prepare students for the work in Architectural and Mechanical Drawing. Instruction in Free-hand Drawing is given by means of lectures and black board exercises. The work includes also visits to the shops, to give students a more intimate and intelligent knowledge of the materials with which they are to deal. It often happens that students have had no training in drawing, and find themselves at a disadvantage when they begin Architectural and Mechanical Drawing on this account. The course in Free-hand Drawing is designed to help them in this respect, and is, as follows:

First Year.—B Preparatory Class: Lettering, Sketching, Copying Historical Frets, Color, in detail.

Second Year: A Preparatory Class.—Sketching, Parts and Relations, Type forms in detail, Moulding, Dictation Exercises, Geometric Figures, Representing surfaces, Practical Drawing.

Third Year: Junior Class.—Sketching continued, Arrangement, Measurement, Judging Distances, Constructive Design, Color Work, Application to all with practical work.

Fourth Year: B Middle Class.—Projection, Fore-shortening, Development, Frets and Borders, Pen and Ink Work, Design.

MUSIC.

Considerable attention has always been given to music at Tuskegee, but it has been only within recent years that the institution has been able to offer a systematic course in instrumental music. There are eight pianos and two cabinet organs belonging to this department. There is also a good musical library, from which students have the privilege of drawing music for practice. A charge of \$4.50 per quarter is made for instruction in piano.

COURSE IN PIANOFORTE.

FIRST GRADE.—New England Conservatory Method, Book I; Mathews' Graded Studies, Book I; Koehler op. 150; Czerny op. 139 (First twenty-nine pages); Major Scales in one and two octaves; Little Pieces by L. E. Orth; Special technical exercises for developing correct finger and wrist movements.

SECOND GRADE.—New England Conservatory Method, Book II; Czerny op. 139, completed; Mathews' Graded Studies; Koehler, op. 50; Burgmueller, op. 100; Pieces by Streabbog, Lichner, Gurlitt, Reinecke, etc. Major Scales in three octaves and Minor Scales begun.

THIRD GRADE.—Plaidy's Technical Exercises; Czerny, op. 802; Heller, op. 45 and 46; Loeschorn, op. 52; Bach-Two-Voiced Inventions; Czerny, Octave Studies, op. 553; Major Scales in four octaves, and Minor Scales continued; Selections from New England Conservatory Method, Book III, and Mathews' Graded Studies.

FOURTH GRADE.—Czerny, op. 740; Bach-Three-Part Inventions; Mathews' Graded Studies; Loeschorn, op. 67; Clementi—"Gradus ad Parnassum;" Kullak Octave School, Part I; Bach's French Suite; Mendelssohn's Songs Without Words; Sonatas by Mozart and Beethoven; Major and Minor Scales completed, and Arpeggios Pieces by Classical Composers.

VOCAL MUSIC.

The course in vocal music is given along with that of the Academic Department. Students are graded and promoted on examination, the same as in other studies.

The Choir has a membership of one hundred and ten. It rehearses regularly five times a week, and sings on all public occasions. Any student who has a good voice and has reached a certain grade of advancement in reading notes, may become a member of the Choir. There is no extra charge for instruction in vocal music.

THE CHILDREN'S HOUSE.

The Training School of the institution has for many years been located in a building poorly suited for such a purpose. A generous friend last year gave the money for a new building, which has been designated "The Children's House," for the Training School. This building is modern in all of its appointments, and is admirably suited for the purpose for which it is to be used. It is a frame structure, one story high, in plan approximately in the shape of the letter H, the outside dimensions being 68 by 90 feet. It contains an assembly room, a room for the Kindergarten, and two rooms for the Grade work. Other rooms are provided as follows: For the girls, a kitchen, dining-room, bed room; for boys, a room for manual training. Besides these, there are bath rooms for both boys and girls, cloak rooms, closets, and also private rooms for the teachers. The building is well lighted and ventilated. The inside walls are plastered and ceiled overhead.

The Grade work done at "The Children's House" is the same as that done in the C and B Preparatory classes. When children come from "The Children's House," they are able to enter the A Preparatory class. For the first time, this year we have been able to offer a systematized course in Kindergarten work, as follows:

ELEMENTARY AGRICULTURE.

A two-acre piece of land has been provided for instruction in elementary agriculture, and the children who attend "The Chil-

dren's House" are taught the names and uses of garden and farm tools, the preparation of the ground, the making and application of fertilizers, the planting and germination of seeds, the growth and maturing of plants, the harvesting of crops, etc. The cultivation of the Home Farm is also closely watched. The course of study is as follows:

First Year.—1. Gardening: Kinds, value. 2. Tools: Kinds, care, use. 3. Planting: How to plant for fall vegetables; window plants. 4. Seeds: Naming, value for food, etc. 5. Seeds: Conditions for sprouting; value of seed leaves. 6. Testing for vitality; when and how to plant. 7. Kinds of soil, preparation. 8. Plants for food for man, for other animals. 6. Collecting insects; vegetable exhibition.

Second Year.—1. Soils: Uses of each; formation. 2. Hot beds, cold frames, seed beds, walks, terraces, keeping in repair. 3. Fall Vegetables: Planting, cultivation, protection. 4. Farm and garden tools; new and old kinds compared with respect to saving labor. 5. Winter plowing: When, where and how. 6. Trees and shrubbery: Planting, care, reasons for. 7. Early vegetables; relation of crops to fertilizing, planting, care and cultivation. 8. Insects; names and habits; why protect same; method of exterminating the injurious ones. 9. Irrigation: Why irrigate; methods; time.

PROGRESSIVE NATURE STUDY.—The Institute's leaflets on Nature Study are used as suggestive steps in this work. Frequent excursions to the school gardens, truck farm, neighbor's gardens and fields, furnish splendid opportunities for the little minds to become acquainted with Nature's God.

KINDERGARTEN COURSE.

The underlying thought of the Kindergarten year is the connection of the seasons.

FALL.—Subject: Preparation of Nature and her creatures for winter. Work-time in contrast to rest-time.

The changes are illustrated by drawings with colored crayons and by the paper cutting.

In the early fall many of the talks are on the family; the child's relationship to mother and father leading him to an appreciation for Thanksgiving Day, the salient thought of which is an expression of gratitude for all the blessings which come into his life.

The preparation for the winter rest time culminates in the Thanksgiving Party, and the spirit of thankfulness is expressed at Christmas time in the gifts that are made for the parents.

WINTER.—Subject: Protection.

The Carpenter is the protector of the family.

Houses of different dimensions are built with the Building Gifts, which develop the ideas of high and low, large and small, wide and narrow.

The shoemaker is a symbol of personal protection. His shop is visited, and the children watch him at his work.

Shoes are folded with paper and moulded with clay.

Knights and soldiers are symbols of state protection.

We endeavor to develop the heroic and cultivate and strengthen the spirit of patriotism through the celebration of Washington and Lincoln's birthdays.

The ideal of all that is good is presented to the child in the songs of the Knights.

Drums are modeled and bugles cut from paper.

SPRING.—Subject: Awakening of life.

Talks are given emphasizing the importance of wind and sun.

Windmills and weather vanes are folded with paper.

Flowers and Birds:

The pussy willow is the first sign of awakening life. Birds, birds' nests and eggs are modeled and jonquils drawn.

The Easter thought is introduced through the Light Songs, and the Bible Easter Story told.

The rabbit is installed in the Kindergarten with a generous nest of Easter eggs.

In April the birthday of Frederic Froebel is celebrated; badges are made in the form of Froebel's favorite flower (the daisy) and worn by the children.

Gardening: Seeds which the children bring are planted in the garden, and small tools are given them to carry on this interesting work.

Games, illustrative songs and stories are a part of each day's program. The games teach habits of animals, and help children to be more in sympathy with them. The songs bring forth some truth, increase the love for music and emphasize rhythm. Stories lift the children from their environments; each has some good moral, and they are important in that they improve language.

THE BAND AND ORCHESTRA.

The Institute Brass Band contains thirty pieces, and is instructed by a competent director. The Orchestra consists of fourteen pieces. In selecting members of either the band or the orchestra, preference is given to those who have some knowledge of wind instruments, or other instruments used, but any student who desires to join will be given a trial if there is a vacancy.

PEDAGOGY.

The aim of this course is to give students a knowledge of education as a science; to stimulate the desire for the broadest self-culture; to acquaint them with important educational problems; to create a love for the child, and an enthusiastic interest in all matters pertaining to the school.

Among the topics for special study are: "What Education Is;" "Variety of Education;" "Study of the Child-Body-Mind;" "Laws of Mind and Teaching;" "The Teacher in the Class;" "Attention and Interest;" "Moral Instruction and Training;" "Personality in the Teacher;" "Selection and Arrangement of Studies;"

METHODS OF TEACHING AND SCHOOL MANAGEMENT.—Instruction is given on the best methods of presenting subjects taught in elementary and secondary schools. "Type Lessons" are given on all subjects. Training in the principles of the best School Government are also given, and Organization, Instruction and Discipline are considered.

PRACTICE TEACHING.—"The Children's House" in connection with the Normal Department furnishes a most valuable opportunity to student teachers for observation and practice lessons in all phases of the school work for children. The student teachers observe and practice here throughout the year under the supervision of the critic teacher.

Carefully prepared plans of all work, mental and manual, are made in advance of the exercises and submitted for examination; and work planned with utmost care is assigned to the student teacher.

A conference is held at the end of each week for the purpose of reviewing the work with model and student teachers.

POST GRADUATE WORK.

The enlarged equipment and increased facilities for teaching trades at Tuskegee make it possible for the institution to offer splendid opportunities for advanced or post-graduate study along

industrial lines. Young men and women, whether graduates of Tuskegee or other schools, will find here an excellent chance to completely master the fundamental principles of a trade as well as to become proficient in the practical application of these principles to actual work. In addition to the work at the trade, each person taking a post-graduate course, is required to give at least one hour per day to some literary study. Post-graduates are measurably free from most of the rules and restraints of student life, but are, nevertheless, subject to such rules and regulations as are necessary to insure proper protection both to themselves and to the institution. If further information is desired along this line it can be had by addressing the Principal.

PUBLIC RHETORICALS.

The Public Rhetorical work is confined to the Senior and A Middle classes. It is in charge of some member of the faculty who has had special training for this kind of teaching. The Seniors are given careful instruction in the fundamentals of Elocution and Public Speaking, together with thorough drilling in the art of writing essays and orations. Each member of the class is required to write one essay, and one oration during the year on subjects selected by the instructor in charge. The orations are delivered at some one of the monthly rhetorical exercises.

Each member of the A Middle class is required to write an essay on some industrial subject and submit it for criticism and correction. Some speech or declamation must also be committed and after the necessary drill, delivered in public.

In addition to the work above outlined the two classes have a yearly public debate. The subject of this debate for 1901-1902 is: "Resolved, That the Filipinos Should be allowed Their Independence." The A Middle Class contestants, Joseph F. Lawson and Sumner George won the debate.

PRIZES.

TRINITY CHURCH BOSTON PRIZE:—This prize originally for \$25.00 was founded in 1895 by Rev. E. Winchester Donald, D. D., Pastor of Trinity Church, Boston. In 1901, Dr. Donald increased the prize to \$40.00. It is now awarded as a first prize of \$25.00 and second prize of \$15.00 to the two students of the Senior and A Middle classes who deliver the two best orations on subjects submitted by the founder. Usually six or eight contestants

are selected from among those of the classes submitting orations to compete for the prizes. The subjects for the Academic Year, 1901-1902 are:

1. Industry as Related to Character.
2. The Influence of George Washington.
3. Agriculture, a Factor in Civilization.
4. The Advantage of Service.
5. The Survival of the Fittest.
6. Lincoln as a National Character.
7. What Industrial Education is Doing for the Negro.

THE W. GRAHAM TYLER PRIZES:—Mr. W. Graham Tyler, of Philadelphia, Pa., desiring to encourage students to finish their trades and to stimulate among them a greater interest in the trades, has given \$50.00 to be distributed annually in prizes, as follows: The first prize of \$10.00 to be awarded to the student who does the most perfect work during the year. The second, third, fourth and fifth prizes of ten dollars each, to be awarded to the students of worthy character who exhibit greatest earnestness and diligence at their work.

These prizes are to be given only to members of the Senior Class, but the entire record of students during the years they have been in school, will be taken in consideration when making the selection for awards.

THE JOSEPH R. FRY PRIZE:—A prize of Ten Dollars was established during the present year by a Boston gentleman in memory of his father, Joseph R. Fry, to be awarded to the student, male or female, who makes most progress at his, or her, trade, and at the same time makes the best record in academic studies.

THE F. W. OSBORN PRIZE:—Mr. F. W. Osborn of Brooklyn, New York, has also established a prize of Ten Dollars to be awarded the student whose record is most satisfactory in Mechanical Drawing during the current year.

Phelps Hall Bible Training School.

ESTABLISHMENT.—The Tuskegee Institute realizing that the demand for an educated ministry is growing throughout the South, opened the Phelps Hall Bible Training School in 1893. To enter the Bible School it is not necessary to have a special call to the ministry. Those who desire to do missionary work only, or to become intelligent Sunday School teachers, as well as those who intend to preach, will be greatly helped by taking the course.

OBJECT.—The chief aims of the Bible Training School are to give to young colored men and women a comprehensive knowledge of the entire English Bible, and to implant in their hearts a noble ambition to dedicate their lives to the elevation and Christianization of their people. The students are required to do missionary work in the various churches and Sunday Schools near the institution. In this way they have been very helpful to the neighboring communities.

The teaching in the Bible School is wholly undenominational, the intention being not to oppose or antagonize any theological work now being done, but rather to assist all denominations.

THE BUILDING.—Phelps Hall, the building in which the School is taught, was given by a generous New York friend. It is a frame structure, three stories high. On the first floor are the Chapel, Library, Reading Room, Office of the Dean, and three recitation rooms. The two upper floors, containing forty rooms, are used for sleeping apartments.

TEACHERS AND LECTURERS.—Rev. Edgar J. Penney is the Dean. He is assisted by Rev. B. H. Peterson and Rev. J. H. Gadson. Rev. C. O. Booth, D. D., of Selma University, Selma, Ala., Rt. Rev. George W. Clinton, of Charlotte, N. C., and Rev. H. T. Johnson, Ph. D., of Philadelphia, Pa., deliver a regular course of lectures during the term. Dr. F. J. Grimke delivered a special course of lectures during the current year.

EXPENSES.—The teaching is free. The cost of board, including furnished room, light, fuel, washing, etc., is \$8.00 per month. Students will be given an opportunity to work out from \$2.00 to \$3.00 of this amount, thus leaving only \$5.00 to \$6.00 to be paid in cash. In some cases arrangements may be made so that a few may work out the whole amount. Lack of means need debar none.

STUDENTS AND GRADUATES.—There have been twenty-six graduates from the Bible School. Some of these are actively engaged in ministerial work; others, with the ministry in view, are pursuing further studies in other institutions, while still others are teaching.

The total enrollment in the Bible School this year is seventy-two; sixty-nine males and three females. Six are ordained ministers, thirty-three licentiates, and the remaining thirty-three are laymen. These students come from ten states, one territory, the District of Columbia, and the West Indies. Eight denominations are represented.

COURSE OF STUDY.—The course covers three years. First year: The Bible (five lessons a week); Introductions, Divisions, Names, History, Chronological Order, Literary Character and general view of the contents of each book; Inspiration, Principles of Interpretation.

The Gospels.—Peculiarities and Analysis of each; Harmony; The Life of Christ; His Personal Character; Claims and Doctrinal and Ethical teachings.

Second Year.—The Bible (three lessons a week); Hebrew Poetry; Prophet Language and Symbolism.

Acts of the Apostles; Epistles and Apocalypse.

The Founding and Extension of the Church, and Doctrinal, Ethical and Eschatological Teaching of the Apostles.

Third Year.—The Bible (three lessons a week); The Old Testament, to be studied as history and literature, with special reference to the development in Experience and Prophecy, of Ethical Conceptions, Doctrines and the Plan of Salvation. Careful and analytical study of several books.

Biblical Theology (two lessons a week); Topical Study of the teachings of the Bible concerning the Being and Attributes of God, the Nature of man in Repentance, Faith, Prayer, Atonement, Regeneration, Justification, Sanctification, the Work of the Holy Spirit and the Future Life.

Sermons, Criticisms, etc., twice a week.

Miscellaneous Work, Biblical Geography, twice a week.

Pastoral Theology, Sociology, Mind Study, two lessons a week.

Evidences of Christianity, training in Reading the Bible and Hymns, in singing and sermonizing throughout the course.

LECTURE COURSE.—Three courses of lectures supplementary to the regular course of study are given by non-resident ministers. Each course comprises ten lectures. First Course.—I. The Bible. Its Necessity. Its Adaptability to Man. Its Influence in Shaping Human Affairs. II. Formations and Divisions of the Bible. III. When is a Book Genuine? When Authentic or Creditable? Genuineness and Authenticity of the Gospel Narratives. Inspiration; its Nature and Extent When Applied to the Scriptures. Interpretation and how it Should be Applied to the Scriptures. Bible Chronology.

Second Course.—I. Some Elements of Pastoral Success. II. The Minister a Moral Teacher. III. Sources of Power. IV. Sham or Substance. V. The Minister's Spare Time. VI. Manhood Making. VII. Self and Service. VIII. The Ministry of Adversity. IX. The Ministry of (a) Little Things, (b) Magnitudes. X. The Office of the Conscience.

Third Course.—I. The Best Method of Studying the Scriptures. II. The Rise and Progress of the Christian Church. III. The Teachings of Christ and His Apostles as to Doctrines, Morals and the Future State.

Note.—This course is subject to revision each year.

THE HENNERY.

THE DAIRY.

COW BARN.

HORSE BARN.

The Chapel.

The Chapel supplies a long-felt need at Tuskegee. For many years a long, low, wooden structure called "The Pavilion" was used for religious services and other public exercises.

Exteriorly, the Chapel is the most magnificent building on the school grounds, and stands on a site that immediately commands the attention of all visitors. The plan is that of a Greek cross, with its extreme dimensions 154 x 106 feet. The roof is of hammer-beam construction, and the main trusses have a clear span of sixty-three feet. The seating capacity is 2,400; the pulpit platform is large enough to accommodate the entire faculty of the institution. Directly behind the platform is the choir stand which will comfortably seat 150 persons. Facing the pulpit at the opposite end of the room a gallery extends out thirty feet into the main auditorium. In the rear are choir room, study for minister and two small vestibules—one on either side of the Chapel, giving entrance to choir room, study and main auditorium.

The yellow pine finish, the high ceiling, the tall windows with glass that diffuse the light in delicately colored tints make the entire interior appearance strikingly beautiful.

The electric lighting is from three large central chandeliers, reinforced by many small lights placed around the auditorium.

All the plans and specifications were made by the Institute's instructor in Architectural and Mechanical Drawing, and most of the labor used in its erection was performed by students. While doing this work these students were acquiring a knowledge of their trades, and were at the same time paying their board and securing academic training. The Tuskegee method is to allow students to acquire a knowledge of their several trades while working on these buildings, pay their board and get their education at the same time. This is especially helpful to those who come and find themselves unable to pay any part of their expenses. In the present matter, for instance, the money given for the Chapel has given the students an opportunity to learn plastering, brickmaking, brickmaking, painting, etc., at the same time attending night school, helping themselves and providing the Chapel.

Department of Mechanical Industries.

Under this head are included all the purely mechanical trades open to young men at Tuskegee. There are comparatively few schools where young colored men can acquire a thorough knowledge of these industries and there are practically no opportunities for them to serve as apprentices. The equipment of the Mechanical Divisions at Tuskegee is excellent. The institution expects that young men who finish from any one of its Trades' Divisions will, as far as possible, supply the great need for trained industrial leaders throughout the South. In all the Divisions three objects are kept constantly in view:

FIRST. To teach the dignity of labor.

SECOND. To give the student a thorough knowledge of the trade.

THIRD. To enable students to pay a portion or all their expenses in labor.

Students desiring to enter any one of the Mechanical Divisions must be able to meet the requirements for admission to be found on another page of this catalogue.

SLATER-ARMSTRONG MEMORIAL TRADES' BUILDING.

The Slater-Armstrong Memorial Trades' Building is splendidly suited for the teaching of trades. It is a brick structure rectangular in shape, with a court in the interior. The outside dimensions are two hundred and eighty-three feet by three hundred and fifteen feet. The front central portion is two stories high; it contains twelve, large well-lighted rooms with coat, tool and storage closets attached to each. The Director of Industries has his office in this building.

CARPENTRY.

The work in this division is subdivided and taught under three heads: Carpentry, proper, Wood-turning and Cabinet-making. In the carpenter shop proper there are fourteen work benches, with three locked drawers and a closet attached for tools and unfinished work. Each apprentice is provided with a full kit of tools and in addition there is a general tool room in the shop supplied with all tools adapted to the needs of a carpentry establishment. The course of study in carpentry covers three years:—

CLASS IN WOOD-WORKING MACHINERY.

First Year: Names and uses of tools; sharpening and setting for use. Working out pieces of timber to various gauges and lengths; straightening, squaring, beveling. Forming angles by halving pieces together, as applied in framing. Plain dovetailing, as applied in framing. Sketching and making plain brackets. Lectures on general topics. Study and construction of the Sixteen Problems in Carpentry from 1 to 5, inclusive. Observation lessons.

Second Year: Framing. Inspection of brick work. Straightening, squaring and plumbing. Bracing, tying and bridging. Sizing studs, joists, etc. Formation of cornices. Setting window frames. Shingling and flooring. Rafter cutting. Weatherboarding and boxing. Lectures and supplementary studies. Study of Sixteen Problems in carpentry, from 6 to problem 11. Selection of building sites and examination of building soils, etc.

Third Year: Stairway building. Rises, and treads. Making patterns of stairs. Hints in wood carving and application in cabinet making. Drawing brackets from original and selected designs. Furniture making. Care and use of machinery; how to set a machine and regulate the speed thereof; how to sharpen bits, etc. Bill of lumber; estimates. Lectures and supplementary studies. The Sixteen Problems in Carpentry completed. Lessons in making out bill of material of various kinds used by carpenters.

The course of study in wood-working machinery covers one year and begins at the commencement of the second year in carpentry. It is as follows:

First Quarter.—Names of machines, their uses and how to use attachments. How to set up and regulate speed of machines, and care of same. Brazing apparatus and the care of it. Names of edged tools used with the machine; how to sharpen and use same.

Second Quarter.—Practical work on each machine from black-board designs or sketches made by instructor. Wood-turning to fifth exercise in Golden's Laboratory in Wood-turning.

Third Quarter.—Golden's Laboratory Course in Wood-turning, completed to thirteenth exercise. Practical work on all machines. All work executed this quarter must be from blue prints.

Note:—At the end of the second quarter all apprentices must submit samples of work done on each machine to the Director of Industries for inspection. At the end of the third quarter they must do the same with blue prints attached to sample.

The Cabinet Making Course is of equal duration with that of Carpentry proper and is arranged so that the student may acquire a complete knowledge of the art.

CARPENTRY; THE REPAIR SHOP.

The regular Division of Carpentry has been so crowded for the last few years that it was found necessary to organize an auxiliary division. This division is known as "The Repair Shop." The course of study is similar to that in the regular carpenter shop and extends over the same length of time. All the school's repairs in wood-work are done by students in the Repair Shop.

BLACKSMITHING.

The Blacksmith Shop is located in a room 37 x 60 feet, on the first floor of the Trades' Building. It is well lighted, and large enough to meet the growing needs of this division. It is furnished with nine stationary forges, with Champion blowers. Near each forge is an anvil weighing 120 lbs., and a tool bench two feet high, two and one-half feet wide and six feet long, furnished with drawers and a blacksmith's vise. Each bench is supplied with the following tools: One sledge hammer, two hand hammers, eight round, iron bottom swages, varying from $\frac{1}{4}$ to 1 inch, one set collar swages, twelve pairs tongs, suitable for handling iron, varying in diameter from $\frac{1}{2}$ to 1 inch, four hand punches, varying from $\frac{1}{4}$ to 1 inch.

In this room is the instructor's office and a tool room, where a variety of extra tools are kept and supplied to each pupil when needed to complete a job. In the shop, ironing of carriages, bug-

gies, wagons, carts, drays and wheelbarrows is done, besides the making of all kinds of tools and the shoeing of horses. The course of study follows:

COURSE OF STUDY.—First Year. Cleaning the shop. Making fires. Names of tools and their uses. Care of tools and their places. The importance of keeping water and coal in the troughs, also economy. Striking. The different size drills and how to run a drill press. The different size stocks and dies, also how to cut threads. How to keep shop in order. Compositions are written on these subjects monthly. The use of the hand hammer and tongs. The figures on the rule and measurements. The different sizes of iron. The formation of iron and steel. The different kinds and grades of iron and steel. Welding iron, also the different kinds of welds, viz: Plain, jump, dovetail, and also long and short laps and their effect, and scarifying. The use of sand. Practice in making lap links, lap rings, staples, hasps, S-hooks, gate hooks, hame hooks and round rings. Resetting tires and the use of the traveler. Compositions are written on these subjects monthly. Also monthly examinations are given in all work. The use of welding compound. Welding steel, viz: Spring, tire, axle and tool. How to get the measurement on jobs without the bed. Welding and setting axles. Measurement of the track of axles. Welding and setting tires, also dish of new wheels. Making clips, nuts, brace ends; also welding braces the proper lengths. Putting work together. Bench work, viz: Filing, clipping, jointing and fancy work. The effect of sand and emery paper on finished work. Compositions are written on these subjects monthly.

Second Year. Horseshoeing. The condition of a shoeing floor. How to make a shoer's fire. The name and use of shoeing tools. What and how to make a mould, also how to strike on a shoe. The names and sizes of shoes and nails, also the different kinds of shoes. How to file a shoe, also how to pull off a shoe, trim the foot and clinch a shoe. The different parts of a foot and how to drive a nail. The different kinds of shoes that are used for horses with different ways of traveling. There are special lessons given in fitting, viz: Different ways of traveling and different shaped feet. Compositions are written on these subjects monthly. Wagon work, such as farm wagons, express-wagons and platform wagons. Dash and rail work, and the different kinds and names. Fender work. Making different kinds of tools, also tempering. Work from drawing. Repairing different parts of buggies. Estimating and cost of different things and jobs. Hanging and trim-

ming up of jobs. Compositions are given monthly on each subject. Buggy gear work. Body and hoop work. Practice in truck and carriage forging. Different kinds of traps and their names. Talks on general work are given each day. Repair work of an advanced order is done by the students while this course is being taught.

PRINTING.

This is one of the most important divisions of the school. The Printing Office is located in one of the front rooms of the Trades' Building, in a room 37 x 56 feet, on the first floor. It contains one large, two-revolution Campbell steam press, one proof press, one 12-inch perforator, one card cutter, one stapling machine, four job presses, two of which are run by steam, one large, 32-inch Challenge power paper cutter, 160 fonts of job type, 1,000 pounds of newspaper and book type, one New York drying rack, one round cornering machine, and all necessary apparatus for a large printing office. A weekly newspaper and a monthly newspaper for the institution, besides three others for the outside, minutes, catalogues, and all the pamphlets and other matter of the school are printed by the students of this division. The course is three years as follows:

COURSE OF STUDY.—First Year: Care of office, oiling presses, treatment of rollers, learning type names, point system and tools of the trade. Learning the technical terms employed in the trade, proving, signs and proof marks, lay of the case, proper position at the case and general review.

Second Year.—Care of presses, learning to make ready and to run a platen press; learning to regulate impression on platen press, distribution of color, care of ink and mixing colors; learning names and sizes of paper, use of the paper cutter, the care of same and general review.

Third Year.—Composition, proof reading and type-setting contests. Great care is taken in teaching the importance of uniform spacing, careful justification, accurate punctuation and correct capitalization. Measuring type, casting off copy and imposition. Making up and locking newspaper forms. Making ready on cylinder press; overlays and underlays for type and various kinds of cuts. Making out orders, rendering estimates and writing essays on subjects relative to the trade. Lectures on Color Printing, Journalism, Book-binding, the Progress of the Printer's Art and allied subjects.

The instruction in this course embraces all kinds of general merchantile, newspaper and book printing, such as bill-heads, note-heads, statements, letter heads, business and visiting cards, dodgers, circulars, blank forms, book, tabular work, bank checks and bank-book binding. The appearance of each job is given careful and critical attention, and the principles which apply to good display are fully explained in each piece of work. All jobs are first outlined on paper and presented to the instructor for approval before any type is set. Originality is rigidly insisted upon.

To enter this division, students must be able to read manuscript, spell and have a fair knowledge of punctuation. At the end of the course, students are competent to take charge of a small office. Forty-five minutes are given, three times a week, from 4:45 to 5:30, during which time the students are given theoretical training. The students in this division are given instruction in mechanical drawing.

WHEELWRIGHTING.

The Division of Wheelwrighting is situated on the first floor of the Trades' Building. It is fitted for work in general wheelwrighting and trimming. In this shop are located eight woodworkers' benches, 32 inches high, 42 inches wide and 8 feet long. Each bench is divided into two divisions with a vertical board, making it possible for two persons to work at the same bench without interference. These benches have three drawers and one closet on each side, in which the tools used by the students are kept.

Each pupil is provided with the following tools: One coachmaker's vise, $4\frac{1}{2}$ inches in the jaw, one 26 inch No. 9 saw, one 12-inch back-saw, one fore-plane, one jack-plane, one smoothing-plane, one set chisels, varying from $\frac{1}{4}$ to $\frac{3}{4}$ of an inch, one ratchet brace, one set auger bits, one set gimlet bits, one coachmaker's drawing knife, one spoke shave, one marking gauge, one tri-square, one bevel square, etc. Other tools are kept in reserve by the instructor, and used only when needed.

This division is turning out first-class work in the line of wagons, drays, horse and hand carts, wheelbarrows, buggies, road carts and the trimming of old vehicles.

COURSE OF STUDY.—First Year: Care of tools. Elementary, with saw, plane, drawing knife, chisel and spoke shaver. Kinds of joints, splices, mortises, tenons, mitres. Kinds of wood used; how to select.

Second Year.—Pattern-making; working by patterns. Making wheelbarrows, carts, trucks and wheels. Construction of wagons, carts and drays. Sketching work.

Third Year.—Practice in building wheels continued. Copying with dimensions into note books, and working from copy continued. Building buggies, bodies and gears. Construction of buggies and phaetons.

During the second year, instruction in wood-turning is given as follows:

WOOD-TURNING.—First Quarter: Names of machines, their uses and how to use attachments. How to set up and regulate speed of machine, and the care of same. Brazing apparatus, the use and care of it. Names of edged tools used with the machine; how to sharpen and use same. Review.

Second Quarter.—Practical work on each machine from black-board design, or sketches made by instructor. Wood turning to fifth exercise in Golden's Laboratory in Wood-turning.

NOTE.—At the end of the second quarter, all apprentices must submit to the Director for inspection, at least three samples of work done on each machine.

Third Quarter.—Complete to Exercise 13 in Golden's Laboratory Course in Wood-turning. Practical work on all machines. All work executed this quarter must be done from blue prints.

NOTE.—At the end of the third quarter all apprentices must submit to the Director samples of work executed on each machine, with blue print attached.

HARNESSMAKING AND CARRIAGE TRIMMING.

This division is situated in a large, well lighted room on the second floor of the Trades' Building. All of the harness used by the school and a large quantity sold to the public, is made in this shop every year. All of the carriages and buggies turned out by the Blacksmith and Wheelwrighting Divisions, are trimmed by students taking the course in carriage trimming. The course of study follows:

HARNESSMAKING.—First Year: Care of shop, names and care of tools; thread-making and practice stitching. Quality and preparation of leather. Names and dimensions of straps. Repairing all grades of harness. Cleaning and oiling harness. Making odd parts of harness, such as hame-straps, shaft-tugs, bridle fronts, side straps, crupper docks, girths, etc. Fitting and finishing up harness.

Second Year: Review of work of first year. Names and grades of trimmings. Names and grades of leather. Economical cutting of leather. Care of patent leather. Stitching of patent leather. Cutting patterns. Making fancy harness, such as coach, buggy and truck, and all grades of express harness. Review of work done in first and second years. Finishing work. Making all grades of cart and gig saddles. Inspecting work done in shop and criticising all work not done properly.

CARRIAGE TRIMMING.—First Year: Use of scissors and needle. Basting. The use of the tack hammer. Stitching on machine.

Second Year: Drafting, pattern-cutting, making cushions, repairing.

Third Year: Making cushions, continued. Drafting and cutting material for buggy tops. Setting and trimming.

NOTE.—All work supplemented by actual work from time to time. Inspection and correction by the instructor all of the time the students are at work.

Students have abundant opportunities for practical work, by reason of the outside work and the general work of the institution. Night school students in this shop take drawing lessons on Mondays and Thursdays. Theory Class in the shop every Monday, Thursday and Friday, from 4:45 to 5:30 p. m.

PAINTING.

The Division of Painting is located on the second floor of the Trades' Building, in a large, well lighted and well ventilated room. A large Warner elevator is used to take vehicles from the Wheelwright Shop, on the first floor, to the Painting Division, on the second floor. A number of closets are furnished in connection with this room for the use of students, in which to keep material and tools. Adjoining the Paint Shop is a large, closely fitted varnish room. By this department a great deal of house painting, hard oil finishing and graining is done. Each student is furnished with a bucket and a kit of tools; overalls and aprons are furnished by the students themselves. All of the buildings on the grounds, carriages, buggies, carts, etc., as well as the furniture made in the Carpentry Divisions, are painted by the students of this division. The course of study follows:

COURSE OF STUDY.—First Year: Cleaning shop and keeping tools in order. Learning names and uses of brushes. Learning names of colors. Sandpapering and priming. Model work (i. e.)

IN THE PAINT SHOP.

practice on old spokes, wheels, etc. Priming houses. Finishing; interior work, hard oiling and staining. Exterior work; estimates, wagon painting, mixing and coloring putty.

Second Year: Advanced work in interior and exterior decorating. Carriage painting, furniture painting, and sign painting. Mixing paints, gilding, glazing, varnishing and striping. Finishing, graining, tinware painting. Advanced work in staining and hard oil finishing. Estimates.

In all the branches, harmony, or the correct combination of colors, is the prime factor.

Theory Class in the shop every day except Saturdays. The Night School students in the shop have drawing lessons on Tuesdays.

MACHINERY, ENGINEERING AND FOUNDING.

The equipment of this division and the course of study offered, are designed to give the seventy students enrolled during the current year, thorough training in the various branches of the machinery and steam engineering work. The Machine Shop is equipped with the latest machine tools, driven by power from an Atlas steam engine; lathe, planer, shaper, and drill-press work, as well as bench work and a course in erecting is given. All repairing of the mechanical equipment of the school, including steam pumps, steam engines, wood-working machines, printing presses, metal working machines, etc., is done in the Machine Shop. About fifty different machines outside of the Machine Shop, in-

cluding laundry machinery, agricultural machinery, dairy machinery, etc., are in daily operation, furnishing the best illustrations for the theory work of this division. In the steam engineers' course, the young men have studies from eleven different steam engines, seven steam pumps, twelve steam boilers, a complete water works system, with miles of piping, and the various water works' equipment—valves, gauges, recording apparatus, etc.

The instructors in this division give the students the theory and written work pertaining to the trade, and mathematical studies are so correlated as to give the students jobs from blue print drawings and free-hand sketches.

A foundry is also in daily operation, where the castings used by the school in repair work are made. Two cupolas are used, with blast from Sturtevant blowers—one No. 30 Caullian cupola, and one seventeen-inch cupola of the Purdue University make. Two "heats" are made a week, varying from 500 to 1500 pounds of metal poured off each week.

The course in machinery is as follows:—

First Year:—Use of rules, squares, and calipers. Instruction in foundry practice. Vise work in chipping, filing and scraping. Use of taps and dies. Theory of thread standards and measurements. Laying off work for drill press and shaper. Use of punches, centers, gauges and templates. Use of various files, gauge and cape chisels. Babbitting small boxes and treatment of babbitt. Naming machinery parts, and technical terms. The action of steam in the steam engine. Packing unions, glands and man-heads. Machine shop arithmetic and written work. Proper speed of machine tools on various metals.

Second Year.—Drill press work with twist drills. Grinding drills, reamers and counter-borers. Use of various steels, tempering, and annealing. Foundry work in moulding and cupola management. Boring bars in drill press. Valve setting on steam engines. Engine governors and valve motions. Duplex pumps, steam traps and water meters. Proper methods of piping steam machinery. Practical work with injectors, lubricators and air pump. Shaper work in slotting, grooving and beveling. Planer work in straight, oval and bevel cuts. Lathe work in turning straight; and oval and general repair work. Arithmetic in machine shop problems. Boiler management, safety valves, reducing valves, gauges and trimmings.

Third Year.—Use of jigs and templates in interchangeable work. Use of micrometer and Vernier calipers. Lathe turning for shrinking fits. Use of mandrels, arbors and chucks. Erecting machines, with instruction in foundations, and use of hoists, pulley-blocks and lining machines. Five weeks as engineer of electric light plant, with three engines to adjust and manage. One given period as foreman of machine shop. Cutting worms and inside threading. The steam engine indicator, reducing motion and diagrams. Instruction in gear wheels and pinions. Work in turning, drilling, planing and shaping in tool-making. Machine shop arithmetic. Original work in machine design.

FOUNDING DIVISION.—First Year: Students entering this department, are first taught the names and uses of tools, how to cut and temper sand for moulding. Cleaning castings, ramming up drags, lifting and closing flasks. Students are expected to have thorough training in the foregoing steps before beginning work as moulders. The practice of putting up simple moulds, the use of the clamping bar, the names and uses of the different kinds of facings used in the foundry, venting, sponging, and drawing patterns and gate cutting.

Second Year.—Carrying and pouring off iron by use of hand ladles, at which time the qualities of iron are explained for the different grades of moulding. Skimming and feeding are carefully practiced. The student is given the higher branches of moulding, as in pump and engine building, stone moulding, fancy return work, core-making and core-venting. Cupola management, lining cupola, mixing iron, making charges, tapping out and stopping in. The management of the foundry as an ideal shop is particularly associated with every step given in the course of study.

SHOE-MAKING.

The Division of Shoemaking is on the second floor of the Trades' Building. Most of the shoes worn by teachers and students of the school, are made in this shop, as also are many for outside customers. Repairing of shoes for all of the school is done by the shop. During the year of 1900 there was added to this division a full set of Goodyear Shoemaking Machines, at a cost of \$785, exclusive of cost of engine for running same. The set consists of one Goodyear Welt or Turning Machine, one Goodyear Rapid Lock Stitcher, one Welt-channeler, one Outer-sole Channeler, one Welt-beater, one Bobbin-winder, one Welt-groover

and one Welt-splitter. Besides this machinery, two Wheeler & Wilson latest improved Machines have been added to the upper-making department of this division. The course of study covers three years, and is as follows:

First Year.—Thread-making, waxing threads and putting on bristles. Names, uses and care of tools. Putting last in shoes; use of awl and bristles. Stitching and sewing up rips. Theory class. Mechanical Drawing. Putting leather in case before use. Kinds and uses of leather. Patching and half-soling. Single and double sole sewed shoe. Pumps and nailed shoes. Selection of sole and patch leather, finishing higher grade repair work of different styles. Setting edges and finishing. Inseaming and stitching outsoles on new shoes.

Second Year.—Review of work of first year. Preparation of bottom stock for new shoes. Drafting and cutting patterns. Free-hand Drawing. Upper fitting. Measuring feet. Fitting last to measure. Rounding up insoles for different styles of buttons. Cutting channels. Putting in all styles of boxes. Lasting, inseaming, outseaming, building different style heels, shaping and finishing. Review of work of first and second terms. Higher grade of new work; such as double soles, scotch bottoms, pumps, bevel and square edges, cork shoes for deformed feet. Business methods.

Third Year.—Goodyear Machines. Care of machines, how and where to oil them. Threading and putting in wax. Practice work. How to run machines, set needles, sharpen knives of the different groovers and channelers, and set same. Number of awl used to match needles. Different kinds of tables used in making certain styles of shoes. Names of the parts of the machine. Sewing inseams and outseams. Speed in running the machines; and knowledge of repairing and keeping the machines in running order.

Theory class in shop, Tuesdays, Thursdays and Fridays, from 4:45 to 5:30 p. m. Students in this division take drawing on Mondays and Thursdays, from 7 to 8 a. m. All new work is made from drawings.

NOTE.—In theory class, lectures are given by the instructor, embracing all branches of the trade, as to the best methods of execution. In Mechanical and Free-hand Drawing, the student learns an art that enables him to design and correctly make patterns of his own creation.

BRICKMASONRY AND PLASTERING.

This is one of the most useful and helpful divisions on the grounds. All the brick work on buildings of the school is done by students of this division, under the supervision of the instructor. Plastering and repair work, both on the inside and outside of the buildings, is looked after by this division. The theory is given in the class room, and practical work in the actual construction of the buildings.

COURSE OF STUDY.—First Year: Names of tools used in Masonry Division and how to care for them. How to prepare material for different kinds of Brickmasonry. One hundred and eight lessons in the fundamental principles of the trade from Baker and Kidder.

Second Year.—Staking out buildings; the putting down of the foundations. Limes, Cements and Mortars. Limes: characteristics of slaking and mixing. Sand: Why used and composition. This subject is discussed in its fullest details, reference being made to books bearing on the subject. Research work from trades' journals. Estimating on different kinds of work embracing all the features of the trade.

Third Year.—Foundations: Pile foundations, sand foundations, clay foundations, rock foundations. The student is required to discriminate and draw conclusions concerning foundations. Shoring and underpinning will be studied as to, "jacking-up" and moving houses

Students in this class will be required to do laboratory work, analyzing; plan reading at sight will be required before one can receive a certificate.

BRICKMAKING.

On one of the school farms has been found beds of clay suitable for making brick. From these beds the school has already been able to make enough brick to build its most substantial buildings. The bricks are made, laid and burned by the students, thus reducing the outlay for building to the minimum of cost. The instruction in every way is valuable. The latest machinery has been installed in this division; the output per day during good weather being 20,000 bricks.

The course is as follows:

COURSE OF STUDY.—Clay: Preparation, bulked or heaped, rotted, cut in pones, shaped, dressed, turned. Tools: Shovels, picks, hoes, barbe or mould, strikers, grinding wheel and pit. Setting brick in kiln. Time of burning.

Theory class at the Brick Yard every day except Saturday, from 4:45 to 5:30 p. m.

SAWMILLING.

The saw mill for the present adjoins the carpenter shop and is located in a building forty-eight by eighty-four feet with a boiler room attached. The power to run the machinery of the saw mill is supplied by a 40 horse power engine. It is furnished with the following machinery: One 52 inch circular saw, one No. 5 endless bed surfacer, having a dressing capacity of 10 by 12 inches, one 6 by 26 inch flooring and surfacing machine, one cut-off saw, two lathe saws, one emery stand and grind stone, one mill to grind corn, etc., for stock. The course of study is as follows:

Fall Term.—Names of machines and their use. Care of machines. Defects of timber trees. Felling timber trees and loading logs on wagon. Measuring lumber and wood.

Winter Term.—Scaling logs to find their contents in board measure. Grading lumber. Running planer and other machines. Care of belts.

Spring Term.—Saw filing and caring for saws. Grinding planer knives and cutters. Designing and making cutters for mouldings. Calculating speed of pulleys. Arrangement of machines in a planing and saw mill.

TIN-SMITHING.

The tin shop is located on the first floor of the Trades' Building. The benches run the entire length of one side and one end of the room. Closets are provided in which to keep tools and unfinished work. Nearly every kind of tin work is done in this division, from the covering of a house to the making of pepper boxes. Apprentices have every opportunity to become first class tin-smiths. More than two thousand fruit cans were made in the shop last year as well as many other useful articles.

The shop is well supplied with tools, such as folding machines, grooving machines, wiring machines, setting down machines, large and small turning machines, large and small burring machines, gutter machines, circular shears, stove-pipe machines, vises, hack saws, wood folders, 22 by 30 inches, soldering coppers, bench shears, snip shears, large mantles, horn stakes, hatchet stakes, candle-mould stakes, hollow punches, square stakes, small solid punches, rivet sets, cutting nippers, roofing tongs, double seaming tongs, hand seamers, wing dividers, pliers, squares, mallets, breast-drills, fire pots, etc. The course of study extends over two years, as follows:

First Year.—Names and uses of tools. How to mark and cut straight lines. How to cut round pieces and curves. How to

hold the soldering coppers, so as to turn burs and locks. How to dress soldering coppers and use them: by stopping holes and soldering broken seams, in repairing. The use of square and compass, in laying out the work; making cups, small buckets, and other small articles. Making small pans, biscuit cutters, cake cutters, and water dippers. The more important use of square and compass, as in measuring curves and angles. To make conductor pipes. To put together tin for roofing. The different fluids and other material used as a flux.

Second Year.—First: To make large vessels, including wash pans, dish pans, milk pails. To do general repairing, such as bot-toming large pans, large cans, light repairing on roof. How to solder the different metals. How to draft patterns for making pans, coffee pots, milk pails and the different kinds of buckets and how to make them hold any given number of pints, quarts or gallons. To make stove pipes. To put on the different kinds and styles of roofing. How to draft patterns ellipses, polygons, elbows, for the different shaped vessels, from two pieces, and afterwards from any number of pieces as may be desired. During this term the student learns to make all the difficult patterns and should have such a foundation as to enable him to go out and work at his trade.

There is a theory class three times each week, at which time the student is taught the proportions of different sized vessels, why they are made in different shapes, why a seam should be put in certain places, the kind of tin to put in the different vessels, how to know one kind from another, whether tin or zinc should be used in making or lining a vessel, whether galvanized iron, zinc or copper should be used, how solder is made, what effect the weather has on different metals, etc.

TAILORING.

This division is located on the second floor of the Trades' Building a well appointed room 37 x 56 feet. Two gentlemen are in charge of the work of this division. All of the uniforms for the young men students, as well as suits for students and teachers, are made in this division. The object is to teach the trade thoroughly, and in this much success has been achieved. Girls have been permitted to enter this department, and are being taught tailoring under the direction of the instructors in charge. Very satisfactory results have been achieved, and the object will be to make

the instruction even more helpful and valuable. Young women are admitted to this division as equals of the young men, and many of them show equal aptitude.

The girls in this division make all of the overalls, common pantaloons, vests, coats, etc., used by the students and industrial instructors. The course of study is as follows:

First Year.—Care of shop and irons. Position on tailor's board. Practice in the use of needle and thimble in back-stitching and felling. Cleaning and repairing. Working button-holes. Finishing various styles of pant's pockets. Common pants making. Uniform pants-making.

Second Year.—Review of work of first year. Stitching cord seams and finishing vest pockets. Fine pants making. Making common vests.

Third Year.—Review of work done in first and second years. Making coat sleeves and finishing the different kinds of coat pockets. Fine vest-making. Uniform coat-making. Common citizen coat-making. Review of work done in second and third years. Fine coat-making. Drafting. Drafting and cutting. Harmony of colors and how to select suitable trimmings. Taking measures. Economy in cutting.

Theory class in shop every Monday and Thursday, from 4:45 to 5:30 p. m. Drawing every Wednesday from 4:45 to 5:30 p. m.

MECHANICAL DRAWING.

The drawing room is situated on the second floor of the Trades' Building, in a large well-lighted room, 37 x 80 feet. It contains forty-four tables, 30 x 48 inches on top and 36 inches high. Each table is provided with one drawer, to hold drawing material used by the students. A large case in which students drawings are kept, is also in the room. There is a complete apparatus for making blue prints. Each student is furnished with a set of drawing instruments, a board, a T-square, two triangles, and a rule.

Method of Instruction.—All students in the Day and Night School, who are in the Mechanical Department, and in and above the A Preparatory class, are required to take instruction in this division. The work of the first year is largely preparatory. It begins with simple geometrical drawing to familiarize the students with drawing instruments, and to teach them accuracy and neatness. This is followed by work in projection, which finds application in scale drawings of simple objects.

The student is required to make satisfactory, carefully-dimensioned, free-hand sketches from measurements taken by himself

of the complete object and its parts. Drawing is taught in the drawing room by lectures and exercises at the black board. Models and cuts showing examples of approved practice are used by the instructor, who also gives personal attention to each student's work at his desk as it progresses.

Strictly speaking, mechanical drawing begins with the second year of trade work, with the study of materials and working drawings, and during the last quarter of the third year, students are given instruction in the making of blue, solar and black prints. During the fourth year several excursions are made by the class to the shops, buildings under construction, brickyard, etc. In such excursions, full notes must be taken and a satisfactory written report upon the things seen and examined, submitted.

As soon as a fair knowledge of the instruments has been attained, a thorough drill in projection drawing, in which free-hand sketches are made and measurements taken—these sketches being converted into scale drawings—is then applied to the representation of definite objects. The study of design is carried so far only as to secure an understanding of the principle, facility and accuracy in the construction of drawing plans. In the exercise in designing, the student makes first a sketch plan of the thing proposed, he then constructs a scale drawing, carrying its development into minor details. The course of study is as follows:

A Preparatory Class.—Names and uses of instruments, lettering, construction of plain geometrical figures, simple projection, explanation of scales, objects drawn from scales, free-hand sketches. (See course in free-hand drawing.)

Junior Class.—Projection, working drawings, detail drawings, tracing, materials, free-hand sketches, design, Isometric drawing.

B Middle Class.—Advanced problems in construction, detail drawing, material, working drawing, design, free-hand sketches, blue printing.

A Middle Class.—Design, advanced problems in construction, specifications and contracts, estimates. Strength of materials.

Senior Class.—Problems in construction. Superintending construction. Advanced problems in design. Graphical statics.

NOTE.—Students who have had no instruction in mechanical drawing, even though they make a higher academic class, will be required to enter the first year class in drawing.

ARCHITECTURAL DRAWING.

This course aims to give a thorough course in drawing, building, construction and design. In all cases the general mechanical

and artistic training is supplemented by studies in the Academic Department, unless by examination or otherwise, the individual is exempted.

The course covers three years, and is not open to students below the Junior Class. About one-half of the time is devoted to work in the drawing room. The course of instruction follows:

First Year.—Names and uses of instruments. Free-hand drawing; objects. Lettering; mechanical. Geometric figures. Geometric problems in construction. Elements of plain geometry. Projections; points and lines. Projections; angles and planes. Measured drawings. Working drawings. Various scales. Detail drawing to scales. Free-hand drawing; composition. Projections and developments; solids. Isometric drawing. Tracing and blue printing. Shop work throughout the year.

Second Year.—Materials: Free-hand drawing; composition. Lettering. Elementary construction. Isometric construction. Applied Geometry: angles and planes. Applied Geometry: planes and solids. Problems in construction. Elementary design. Free-hand drawing; pen and ink. Lettering; special problems. Shades and shadows. Measured drawing; advanced problems. Detailing. Geometric solids. Shop work throughout year.

Third Year.—Free-hand drawing; outdoor sketching. Lettering; special problems. Practical geometry and mensuration. Strength of materials. History of architecture. Free-hand drawing; study in charcoal. Lettering; composition. Full size detailing in charcoal. Specifications and contracts. Designs; elective. Free-hand drawing; outdoor problems. Elementary perspective. Advanced design. Working drawings and detailings; estimates. Shop work throughout the year.

On entering the third year class in this course, the student, along with his regular work, is given actual practice in office work and general superintendence. The institution furnishes excellent advantages in this particular, and also in the many trades' shops which are constantly in operation, and which the student is required to visit periodically, with and without the instructor.

Students are required to attend lectures in heating, electric lighting and plumbing at specified times, along with the industrial classes. Certificates are granted students who complete the course and pass the required examination

ELECTRICAL ENGINEERING.

The work of the Division of Electrical Engineering, is designed so as to give the students a thorough knowledge of the

simpler laws of electricity and magnetism, and a practical working knowledge of electrical apparatus. It is thoroughly scientific, as well as practical.

There are special courses arranged in dynamo-tending, line construction, electric wiring and telephony.

The electric equipment of the school consists of a 50 Kw. 60 cycle monocyclic generator and its exciter; 800 16 cp. lamps connected, a telephone exchange, and several annunciator systems. All of the above is used for instruction purposes.

CANNING.

During the summer vacation, the institution operates a steam canning plant, for the double purpose of preserving its own stock of fruit and for teaching the industry of canning to a class of students who remain at the school during the vacation. In an average fruit year about 5000 gallons of fruit are put up by the plant. One gallon tin cans are used. These cans are made in the school's tin shop by the class of young men who are learning the tinsmith's trade. Most of the fruit comes from the orchards of the school. Generally about 2000 gallons of blackberries are canned.

Students wishing to receive instruction in canning, are required to make early application to the Director of Industries to be allowed to remain at the school during vacation.

Department, Industries For Girls.

For the purpose of greater convenience and efficiency, the Department of Industries has been divided and a director placed in charge of those industries for young men, and another for those of young women. With added equipment and better facilities for teaching, we hope to bring the instruction in these divisions up to the highest point of development.

DOROTHY HALL.

Dorothy Hall, the Girls' Industrial Building, is a substantial structure, which was completed and dedicated April 22, 1901. It fronts the Slater-Armstrong Memorial Trades' Building, and is ninety-three feet, six inches, by one hundred and forty-three feet, outside dimensions. It consists of a two-story central part, its long axis extending northeast and southwest, with a projecting stairway hall, fourteen by eighteen feet, and four one-story wings. The first floor contains nine rooms. Opening from the entrance hall are the office, an exhibit room and the waiting room. A cross hall, at the right hand end of the entrance hall, leads to the rooms for dressmaking, millinery and plain sewing. On the left hand side a cross hall leads to the wash room, the assorting room and the ironing room. The basement has two rooms, one for drying and one for storage. The second story has ten rooms, the larger ones averaging twenty feet by twenty-four feet. They are a kitchen, a dining room, a class room and two rooms for mattress-making and upholstering. The small ones, of the average of thirteen feet, six inches by fifteen feet, to serve as models, are a dining room, two bed rooms, a sitting room and a kitchen. The building is built of brick, 535,000 being used in its construction. The roof is tin; the interior partitions are of plaster. The trimmings are of wood. Its cost was \$15,000, and was built by students of the school in all its parts.

PLAIN SEWING.

Girls who know practically nothing about needle work, are admitted into this division, and when they have completed the course, are promoted to the dressmaking division:

CHAPEL AND DOROTHY HALL.

First Year.—Threading needle and use of thimble. Practice work. Basting. Overhanding. Stitching, overcasting, gathering, putting in gussets. Herring bone stitching on flannels. Patching, hemstitching, tucking and whipping, ruffles, chain stitching, feather stitching. Darning on cashmere. Slip and blind stitching, mending, darning. Making button holes and eyelets.

Second Year.—Familiarity with first year's work necessary. Names of sewing machines and parts. How to clean, oil and operate the machine. Attachments, uses. Machine stitches. Choice of material. Instruction in the use of National Garment Cutter. Cutting and making men's underwear, also white and negligee shirts. Taking measures, cutting white shirts by measure. Cutting, basting, stitching and trimming underwear. Cutting and making plain cotton dresses.

NOTE.—This course is intended for hand-sewing, giving practice in all kinds of stitches on suitable material. The National Garment Cutting System is taught in taking measures.

Theory class in the Sewing Room Tuesdays and Thursdays, from 4:15 to 5:30 p. m.

DRESSMAKING.

This has grown to be one of the most important divisions for girls. The room is fitted with large tables for draughting, tracing and cutting, and with sewing machines, dress forms, mirrors, books of modes and show cases for finished work.

Applicants must have completed the course in Plain Sewing, or must pass an examination to prove their knowledge of hand and machine sewing, and their ability to make simple garments, before they are admitted to this division. Course of study:

First Year.—Choice of materials. Draughting and cutting foundation and outlining skirt measurement. Making, hanging draping and trimming skirts. Talks on form, line and proportion in relation to draughting and trimming. Draughting, cutting and fitting plain basques, and general finish of these garments.

Second Year.—Draughting basques, sleeves and accessories to the basques from measurement. Draughting basques with extra seams for stout figures. Cutting and fitting close and double-breasted garments. Cutting and matching striped, plaid and figured basques and skirts. Talks on form, including artistic and hygienic principles of dress. Talks on color and textiles, as applied to dress. Advanced work in making complete dresses from different materials. Much of the time is devoted to practical work.

CLASS IN DRESSMAKING.

Third Year.—Cutting, fitting and pressing. Practice in the use of colors. Talks on the manufacture of cloth. Draughting jackets of different styles; making various styles of collars and pockets. Lining and finishing pockets. Draughting garments of every kind. Making and finishing garments of various kinds from different materials.

Theory classes Tuesday and Thursday, from 4:15 to 5 p. m.

NOTE.—Night School students are not admitted to this division.

MILLINERY.

The appointments of this room, as those of the other divisions located in Dorothy Hall, are first-class in every particular. Excellent results have been achieved in the past, when laboring under difficulties and disadvantages; but more comfortable quarters provide the opportunity for an expansion of the work.

Regular Fall, Winter and Spring openings are held each year, and visitors are invited to inspect the work done by the students. Hats, bonnets and fancy articles are made to order for teachers, and outsiders.

In this division are two graded courses, each covering a term of four months:

First Course.—Talks on color and textiles. Instruction in choice of materials. Wiring. Folds. Binding. Fitted facing; full facing; puffed edges. Varieties of bows. Talks on manufacture of straw and felt hats, and of ribbon. Talks on form and line. Principles applied to a hat of choice. Materials. Examination. Drawing: Pencil practice—cylindrical objects. Drawing untrimmed hats. Drawing drapery, bows.

Second Course.—Instruction on color, form and line. Plain bonnets covered, trimmed, and lined. Talks on the manufacture of crape, and on the growth and manufacture of silk. Crape bonnet. Silk hat or bonnet making. Toque and turban making. Drawing trimmed hats and bonnets. Notes on form and color. Practice in use of combinations of color.

NOTE.—Applicants must be able to do neat hand sewing. Pupils are required to complete satisfactorily the first course, or to pass an equivalent examination, before entering the advanced class. Night School students are not admitted into this division.

COOKING.

The Division of Cooking has two kitchens and two dining rooms. The rooms are well lighted and ventilated. During the past year two hundred and ninety-five girls have taken cooking lessons. The course extends over four years. The institution insists that every girl attending the Day School shall receive instruction in this department. Especial stress is laid upon cooking plain ordinary food. The institution has been able to give the best instruction in cooking. The course of instruction:—

FIRST YEAR.—Making and care of fires. Care and adjustment of lamps used for cooking. Cleaning and keeping in order tables, closets, sinks and pantries. Care of material as it comes from market. Washing kitchen and cooking dishes, and care of baking bowls, dish towels and dish cloths. Cleaning painted and unpainted wood-work. Washing windows, sweeping and dusting. Utensils—proper use and care. Breads without yeast: biscuit, corn bread, sweet and white potato bread, graham and oatmeal. Muffins of each of the above flours, and combinations of rice or grits with them. Pancakes in variety. Making different kinds of toast and using stale breads. Vegetables cooked in simple ways. Meats: simplest forms of cooking meats: making plain, brown and milk gravies and sweet sauces. Cereals—cooking and serving in various ways; also fish and eggs.

CLASS IN COOKING.

SECOND YEAR.—Care of silver, glass, china, brass and nickel. Care of table linen. Laying table for different meals, waiting, clearing table and washing dishes. Cleaning oiled floors. Lessons on providing material for meals, and calculating cost. Preparing given menus, and estimating time required in preparation. Making yeast bread, brown and white, rolls, muffins, coffee, spice and raisin bread. Soup making, with and without meat; purees from beans, peas and other vegetables with, or without milk. Stews, hashes, minces. Chicken: cleaning and cooking in various ways. Bacon: boiled, fried. Tea, chocolate, coffee and cocoa.

THIRD YEAR.—Theory, foods, source, selection and composition. Economic value. Practice: principles involved in different methods employed—(a) boiling, steaming, (b) broiling and roasting. (c) frying. (d) adaptability of different materials. Theory, foods: economic use, classification, practice. Proportion. Tables of average time required. Tables of average cost of material. Bread making according to proficiency of pupils. Vegetables in attractive ways with sauces in scallops, croquets, salads, etc. Advanced lessons in soup making with garnishes. Theory; foods; combination. Effects of cooking on digestion. Practice. Plain pastry, pies and tarts, salads, meats, fish, vegetables, fruits and nuts. Simple desserts, hot and cold. Cakes with and without

butter, with fruit. Cookies. Lectures from science of nutrition. Work with Aladdin Oven. Work with charts and Atwater's Tables.

FOURTH YEAR—Chemistry—Study of dietaries: 1st. Balancing rations of common food material. 2nd. Estimating cost. 3rd. Foods for children, invalids and infants. Study of yeast, mould, bacteria, ptomaines, etc. Practice in work room. Principal means of preserving foods; drying, salting, canning, pickling, preserving, cold storage with illustrations. Arrangement of bills of fare: for daily living, three meals per day. For class room: expense limited to fifty cents for each person. (a) Five food principles, plan, cook and serve. (b) Quantity and relative proportion of each needed. Dinner of three courses for six persons: 1st. To sustain life. 2nd. To sustain life with work margin; average ration; lunch for tennis party. 3rd. To sustain life with work margin and have a balance of reserve (maximum ration). For evening reception: practice cooking cakes, pastry. Salads and other advanced cooking according to orders. Review of first three years. Extra savories and entrees. Roasting, sauces, meats, fowl, game, jellies, marmalade, frozen sweets. Preparing and serving in class dining room each meal of the day. Luncheon and evening colation to Director of Department and invited guests.

NOTE.—Day School pupils only are admitted to the Cooking Classes.

LAUNDERING.

Young women are taught the art of washing and ironing according to improved methods. Two washers, an extractor, a mangle, starcher, collar and cuff ironer have been added to lighten the drudgery. Drying rooms and ironing room provided with excellent facilities afford means for thorough teaching. All of the laundry of teachers and students, including bed and table linen, is done by this division. The course covers one school year:—Water: (a) kinds—how known, (b) uses known. Soap: (a) definition; (b) kinds, (c) why used. Alkalies: (a) kinds; (b) uses. Irons—kinds—uses. Washing: (a) preparation; (b) how to wash flannels, linens, prints. Drying. Preparation for ironing. Miscellaneous work. Laundering laces, silks, etc. Recipes for making soaps, bleach, removing stains. Practice work. Review and examination. Studies in chemical analysis of bluing; Kinds. Starch—varieties. Acids: kinds, uses. Preservers of color in fabrics. Machinery: (a) use, (b) care.

DOMESTIC TRAINING FOR GIRLS.

The home training given the students at Tuskegee is one of the most valuable parts of their training. It is the policy of the

institute to give special attention to the training of girls in all matters pertaining to dress, health, etiquette, physical culture and general housekeeping. The girls are constantly under the strict and watchful care of the Lady Principal and the lady teachers. Special rules governing the conduct of the girls are made known to each girl upon her arrival. In addition to the general training, they receive special practical talks from various members of the Faculty on such matters as relate to the care of the body, social purity, etc.

THE PARKER MODEL HOME is the home of the young ladies of the Senior Class. The building consists of eight large and beautifully furnished rooms, intended for two occupants to the room; a laundry, pantry, kitchen and dining room. The bed rooms are furnished by the students. Only a small outlay of money is required to make these rooms very comfortable and attractive. Here the young ladies are taught to do by doing; the class as a whole being required to do actual work in the line of general housekeeping, cooking and serving of food, and laundering.

The course has been outlined in the following manner:—

The Home: location—sanitation. Furniture—purchasing, arrangement, proper care. Surroundings—advantages. Cleaning: when and how. Lamps, beds, bed-rooms. General weekly cleaning. Scrubbing. Care of dining room: table—serving, linen, silver, pantry, dishes and towels. Duties and manners of hostess. Kitchen: furnishings—care. Marketing. Economy, punctuality and regularity in preparation of food. The Sick Room: (a) attractions. (b) ventilation. Changing of patient's clothing and bedding. Feeding, visiting the sick. Yards and out-houses: how to keep clean and how to beautify. Visiting: when, how and whom to receive. Housekeeper: personal appearance. Dress—what to wear—colors suitable. As far as possible all of the lessons have a practical application.

PRACTICE HOUSE.—In order to give practical demonstration in home-keeping and to develop the sense of responsibility in the work, a four-room house has been set aside in which the Senior girls "Keep House." Four girls at a time live in this house and have the entire care of it. They do all of the work that pertains to ordinary housekeeping, from the Monday morning's washing to Saturday's preparation for Sunday. They are also charged with the responsibility of purchasing the food supplies which they consume. Two dollars and a half is allowed for the weekly expenditure food. In view of the low prices that obtain for provisions here, for

four girls can live comfortably on this small allowance and have variety and plenty, and at the same time, very wholesome food. Thus, the lesson of economy is taught in the most effective way. The girls learn to appreciate the purchasing power of money—a kind of training which boarding students who have so much done for them, do not get.

They acquire the habit of evolving their own plans; of exercising, unhampered, their own tastes. Regularity, system, exactness, neatness, and the feeling of responsibility, are all developed by the system.

MATTRESS MAKING.

The work in this division begins with a systematic series of graded exercises. In connection with the course, the theory of the process in caning and upholstering is taught by talks or by assigned reading. The course covers two years:—

First Year.—Repairing, covering, cutting, preparing materials for mattresses, making comforts. Making mattresses and pillows, cording, boxing, fitting. Beginning chair caning on frames. Drawings. Individual patterns for chair bottoms, designed from studies. Estimates of cost of different materials used for window seats in upholstering. Measurements. Cutting and making.

Second Year.—Studies in designing for caning and making chairs. Practice work. Upholstering. Box couches. Hassocks. Window seats. Test work in designing and making articles manufactured in this division. Written reports on past work, with special reference to present day practice.

BASKETRY.

This course covers four years, and is intended to teach a girl to weave and twist native grasses, the palm, pine needles, twigs, etc., into beautiful and useful forms. It fills the need of a practical and material home industry:—

First Year.—Study of material. Knife work in thin wood. Models—flowers, sticks, etc. Study of tools, simple. Working drawings. Constructive work in wood—box, square joint, shelf-work box, etc. Wood working. Practical application. Implements for school and home use.

Second Year.—Material, native. Gathering and preparation. Study of form and combinations. Brading. Twisting. Sewing. Knotting. Practice in simple forms.

Third Year.—Combination of forms. Practice work in the forms (type). Combination of materials. Studies of ancient and mediæval designs. Theory of Basketry. Individual designs from nature. Scroll and decorative work.

Fourth Year.—Review of forms and designs. Decorative art. Combination of colors. Harmony in materials by constructive work. Comparison of ancient and modern basketry. Combination of these forms. Constructive art; developed. Practice teaching. Practical work in making and repairing cotton baskets, hampers, etc.

NOTE.—Day School pupils only are admitted to this division.

POST-GRADUATE COURSES.

Candidates for these courses must have previously received the preceding courses as prescribed in the catalogue, or they must satisfy the instructor that they possess equivalent attainments.

SEWING.

1. Costume Design: (a) Sketching. (b) Studying human forms. (c) Designing gowns. 2. Art Needle Work: (a) Varieties of stitchery.

MILLINERY.

Drawing. Water-color designs. Designing drapery, bows hats. Outline and proportion of human head. Adaptation of different styles to the face. Studies in historic hat wear. Designing of hats.

COOKING.

Laboratory work. Composition of foods; analysis. Critical study of twelve typical foods. Food economics.

HOSPITAL AND TRAINING SCHOOL FOR NURSES.

This department of Tuskegee's work was organized to meet the urgent necessity of caring for the physical side of the race, along with the mental and industrial.

A beautiful two-story hospital building, with modern improvements, has recently been erected, thus affording enlarged capacities for the care of patients. The first floor contains waiting rooms, lecture and drug rooms, office, hygienic and medical laboratories, dining room and kitchen. The second floor contains a boys' ward, a girls' ward, private wards for boys and girls, bath rooms, and bed rooms for nurses.

The facilities for Nurse Training are excellent and the standard of admission high. Nurses have regular periods in the drug room after beginning the course in *Materia Medica*, which enables

THE HOSPITAL.

them to get a practical idea of the character and compounding of drugs. Graduates from the hospital are doing good work, many having excellent positions in the hospitals, schools and private infirmaries throughout the South. The five nurses the institution sent to the Spanish-American war, were the only colored female nurses employed by the government. The course of study covers three years, but is so arranged that those who are able can complete it in two. The donor of the Hospital Building has agreed to furnish it with the best apparatus now in use in first-class hospitals.

COURSE OF STUDY: First Year.—Department of nurse in hospital and family. Qualifications and relations of nurse to patient, doctor and family. Wards: care, ventilation; model sick room. Beds: care and making. Handling bed patients. Contagion, disinfection, etc. Dietetics; lectures in domestic chemistry. Twenty-two lectures on anatomy and physiology, including names of bones, injuries, articulations, muscles, blood, with its histology. Nervous system, vital organs, intestinal tract, skin, etc. Regular recitations come before and after each lecture.

Second Year.—Dietetics; three months, with practice in preparation of diets. Local applications, disposal of excreta, enemas,

rectal alimentation, hypodermic injection, mechanical appliances. Baths: kinds and effects. Making and keeping charts (fever and symptoms). *Materia Medica*: Twelve lectures, with three months practice in drug room; testing and illustrating drugs of every day use, and compounding simple prescriptions. Symbols and weights, both metric and apothecaries.' Surgery: Twelve lectures, including germ life, wounds and healing solutions, bandages and bandaging, dressing fractures, sprains and dislocations. The operating room; preparation of patient, instruments, care during operation, anæsthetics. (All surgical material is made by nurses). Medical Lectures: Fifteen lectures, including the principal diseases, examination of urine, the excretory organs, use of catheter.

Third Year.—Midwifery: Twelve lectures; practice in ward and city. Diseases of children: Six lectures, including the contagious diseases of childhood, methods of feeding infants and sick children. Diseases of women: Five lectures, including douches, positions, local medication and baths. Massage, practical demonstrations. General review, three months, including hospital management and practical teaching.

The senior nurses take charge of obstetrical and surgical cases in the town; second year students take charge of medical cases.

Agricultural Department.

None of the work of the Tuskegee Normal and Industrial Institute has proven more successful than the work done in the Agricultural Department and that under the supervision of the Agricultural Experiment Station, established by the Legislature of the State of Alabama in connection with the school.

The chief aim of this department is to make the instruction practical as well as scientific. From the beginning of the school, special prominence has been given to all forms of work connected with the cultivation of the soil. About eighty-five per cent of the colored people of the South live in the country districts. They are farmers, and by their labors must support themselves and their families. A part of Tuskegee's method of education has been to prepare young men, by actual work on the school farm, in raising food supplies, caring for stock, fruit, and all useful products, so as to become intelligent and successful farmers. In 1897 a splendid modern building, the Slater-Armstrong Memorial Agricultural Building, it is named, costing about \$10,000, was built and equipped for teaching both practical and scientific agriculture. About the same time the Legislature of the State of Alabama established an Agricultural Experiment Station in connection with the school. During the past year two wings were added to the building, at a cost of \$5,000. Room for adequate laboratory and museum are thus provided. Under the direction of the head of this department, work is carried on in the laboratory and in the field. The laboratory work is simple and easily understood by the students. It consists, in the main, of analyses of the various soils, for the purpose of learning what elements need be supplied in order to make them more productive. This enables the students to make a proper selection of fertilizers. Fertilizers are also tested to find their composition. Feeds are tested to find those best adapted to fat, to milk or to muscle. There is also practical analysis of all dairy products—milk, butter and cheese, and a comprehensive study of foreign and native forage plants. All the scientific knowledge is carried daily into the fields and into the

practical work of the various divisions of the department. In this way the technical knowledge of the laboratory is worked out in the fields and in the products of the dairy, garden and orchard. From fifty to seventy-five cows are milked daily in the Dairy Division. The milk from these cows is used to prove the experiments of the laboratory, and also supplied to teachers and students as milk and butter in the Students' and Teachers' Home departments. Tuskegee butter has been called, by competent judges, excellent, both in appearance and quality.

The orchard and truck garden are also used for practical results. Budding, grafting, trimming, and the care of plants and trees are taught always with a view of supplying fruit and vegetables for the school. Some splendid results have come from the Agricultural Department, and are set forth in bulletins issued by the Experiment Station.

The institution owns twenty-five hundred acres of land, of which fifteen hundred acres are divided into two farms, known as the "Home Farm" and "Marshall Farm." The Home Farm is used to raise vegetables, fruit, poultry, cows, hogs and horses. The Marshall Farm is three miles from the school and contains eight hundred acres of land. Upon it are raised, mainly, heavy grain, potatoes, sugar cane, peas, etc., to supply the boarding department of the school. Vegetables are also raised in great abundance upon it. This farm is cultivated entirely by students. A night school is carried on at the Marshall Farm eleven months in the year.

There has been added to this department, work in dairying, poultry-raising, horticulture and floriculture for girls. The experiment has been tried the past two years with excellent results. A large majority of the young women who come to Tuskegee are the daughters of colored farmers, living on small plantations. How little benefit the people of that class get from gardens, one has only to travel through the country districts of the Southern States to see. If they have a garden at all, it is apt to be choked with weeds and other noxious growths. With every advantage of soil and climate, and with a steady market, if they live near any city or large town, few of the colored farmers get any benefit from this, one of the most profitable of all industries. The girls in the various agricultural divisions have as careful training as do those in any of the other industries, sciences and arts taught here. This work is carried on in connection with the regular school work.

The special object in view is to fit girls for earning a pleasant and profitable living in lines offering rich rewards to the industrious. It is hoped that this experiment, in its ultimate development, will prove one of the most successful features of the work of the school. When satisfactorily completed, certificates will be issued from these divisions. The courses for girls are as follows:—

AGRICULTURAL COURSES FOR YOUNG WOMEN.

FIRST YEAR—Fall Term. **Dairying:** The home dairy is first taken up and a clear knowledge of the following points obtained: kind, use and care of utensils, gravity creaming. A study of stone, wooden and tin churns, ripening of cream, churning, working and salting butter, preparation and marketing of same. Feeding and care of dairy cows.

POULTRY RAISING.—A working knowledge of the following points is here required: The economic value of poultry on the farm, pure and mixed breeds, plain poultry house construction, making of yards, nests and runs. A generous Northern friend has placed \$1,000 at our disposal for the development of this industry. A new building has been erected for the special use of the Division of Poultry-raising.

HORTICULTURE.—Instruction is given as to the importance of an orchard and small fruits, varieties best suited, particular locality, selection and preparation of ground, setting, trimming, extermination of borers, lice, scull, etc., especial stress being laid upon the quality and quantity of peaches, pears, apples, plums, figs, grapes and strawberries, that should be planted in a home orchard.

FLORICULTURE AND LANDSCAPE GARDENING.—A study of our common door-yards, the laying out and beautifying of same, etc., is required. The kinds, care and use of tools used in floriculture and landscape gardening. Trimming and shaping of beds and borders, and the general care of shrubbery and flowers. The gathering and saving of seed. Special treatment of rose bushes and shrubbery.

MARKET GARDENING.—Much stress is here laid upon the management of the home garden, its value to the home, selection and preparation of ground; kinds, care and use of tools; planting, gardening and marketing of fall vegetables. Gathering of seeds, drying pumpkins, cushaw, okra and fruits.

LIVE STOCK.—Study is limited wholly to ordinary farm animals; the number and kind needed, how, when and where to feed; characteristics and utility of the various animals.

WINTER TERM.—Dairying: The commercial dairy is the subject of study, and the following points are emphasized: Use of separators, of which the school has two leading styles; churns, feeding and care of the dairy herd, breeds of dairy cattle and their selection, butter-making, packing, salting and preparing for market.

POULTRY RAISING.—Special study of breeding and feeding. When, how and what kind of eggs and the breed of fowls to set; the period of incubation, poultry book-keeping, saving of eggs for market; an introductory study of young chickens.

FLORICULTURE AND LANDSCAPE GARDENING.—Trimming of beds and borders, mulching, tying, wrapping and preparation of plants for winter. Winter decoration of grounds, the decorative value of native shrubbery; a study of window plants, their value in the home, halls and public buildings, their economic value, etc.

MARKET GARDENING.—The selection of grounds and making of hot beds, cold frames, etc., planting and managing of same, the raising of winter vegetables, marketing.

SPRING TERM.—Dairying: Milking; a study of pastures, how to destroy lice and other parasites, the care of calves, the utilization of waste in the dairy; laboratory work.

POULTRY RAISING.—A more advanced study of young poultry; brooders, sanitation of the house, runs and of all the apparatus; egg testing; moulting and its effects upon different breeds.

HORTICULTURE.—Spring planting, trimming, budding, grafting, spraying, care of grape vines, the wire and post system of supports; spring layering and cuttings.

FLORICULTURE AND LANDSCAPE GARDENING.—Renewing of beds and borders, seed sowing, special study of propagation by layers, cuttings, division of roots, bulbs, etc.; kinds and uses of fertilizers for this special season.

MARKET GARDENING.—Preparation of ground, what and how to plant, special stress being laid upon the production of early vegetables for the home and market. Reproduction of plants by seeds and by division of numbers; water and its office in plant economy.

LIVE STOCK.—Includes the history, development, characteristics, standard points, utility, adaptability to climatic conditions; lessons on judging, care, selection and management of the leading breeds of horses, sheep and hogs.

THE AGRICULTURAL LABORATORY.

SECOND YEAR.—Fall Term. Dairying: A more comprehensive study of milk and its constituents, weeds and their harmful effects upon dairy products, general sanitation of dairy barns, the drawing of plans, etc.

POULTRY RAISING.—Insecticides, how to make, when and how much to use, diseases of fowls and their treatment. A study of foods and their adaptability to different breeds, special study of turkeys and guineas.

HORTICULTURE.—Root and stem grafting with active and dormant buds; formation of trunk and top starch, and its relation to the hardiness of fruits and shrubs, botany of the orchard, entomology; book-keeping.

FLORICULTURE AND LANDSCAPE GARDENING.—Systematic botany, bouquet-making, harmony of color, form and size of flowers, laying out of private and public grounds, roads, parks, walks and streets; entomology of the flower garden.

MARKET GARDENING.—Botany of the field and garden, physical analysis of soils, and the improvement of clay and sandy soils,

the depletion of plant food, and its replacement by direct and indirect fertilizers, the source of carbon, nitrogen and oxygen. Drainage.

LIVE STOCK.—How to hitch and unhitch horses, the care of vehicles and harness, how to drive, the names of common diseases and treatment of sick animals; swine for profit.

WINTER TERM.—Dairying: The weighing and recording of milk in a commercial dairy; the Babcock and other methods of testing milk; composition of cheese and its value as a food.

POULTRY RAISING.—Composition of the animal body; a special study of ducks and geese; brooders, ponds, runs, etc., bi-products and their value.

HORTICULTURE.—Forestry, botany, cryptogamic and systematic nut culture; preservation of timber, the economic value of different woods; the relation of forests to climate, water supply, floods, erosion.

FLORICULTURE AND LANDSCAPE GARDENING.—A more advanced study in the harmony of arrangement, planting, etc., plain designing, with native material only, special stress being laid upon decorations most suitable for funerals, carnivals, the making of bouquets for same, and all kinds of public and private gatherings; bee culture, preparation of hives for the winter, feeding, etc.

MARKET GARDENING.—A study of the life history of insects, injuries to stored grain, peas, beans, meal, flour, dried fruits; botany of the greenhouse, cold frame and hot beds; the use of thermometers. A study of markets, library work.

SPRING TERM.—Dairying: Cottage and Cheddar cheese making, scoring of butter, bacteriology of milk, butter and cheese. Judging of dairy animals by the score card method, diseases of cows and their treatment, analysis of food stuffs.

POULTRY RAISING.—Physical and chemical study of foods, library work, fancy breeds, what and how to exhibit, the history and development of the industry. Heredity and the effects of inbreeding.

HORTICULTURE.—Origin of new varieties by cross fertilization, hybrids, sports, atavism and reversion, correlation between plants and animals, rejuvenating by pruning, grafting and scraping the bark, special diseases of both trees and fruit, and their treatment. Knot growth, blight, gum excrecences and frost injuries; drying, preserving, making fruit syrups, etc.

FLORICULTURE AND LANDSCAPE GARDENING.—Special designing in cultivated flowers. Origin of new species; bees and their rela-

tion to the forest and garden; the hiving of bees and after management. A study of honey producing plants; the economic value of honey.

MARKET GARDENING.—Relation of crops, geology of the garden, agricultural chemistry, good roads and their relation to the success and value of the farm; mineralogy and useful birds and insects.

AGRICULTURAL COURSES FOR YOUNG MEN.

DIVISION OF AGRICULTURE.—First Year. Fall Term: English Language. Live stock (see Notes A-B). Market gardening. Horticulture.

WINTER TERM.—Economic entomology. Practical agriculture (see Note C). Botany, Dairying, Market Gardening, Live Stock.

SPRING TERM.—Bacteriology and vegetable physiology. Laboratory practice. Practical agriculture (see Note D). English. Live stock. Horticulture. Dairying. Market Gardening.

SECOND YEAR.—Fall Term. Botany, cryptogamic. Laboratory practice. Practical agriculture. Agricultural chemistry. Horticulture. Principles of heredity (see Note E). Dairying. Seeds and grasses (see Note G). Market gardening.

WINTER TERM.—Applied botany. Laboratory practice. Live stock. Botany and bacteriology. Practical agriculture. Dairying. Horticulture. Practical agriculture. Drainage (see Note F).

SPRING TERM.—Bacteriology of milk. Practical agriculture. Agricultural chemistry. Laboratory practice. Horticulture. Vegetable pathology. Dairying. Animal nutrition. Market gardening. Live stock.

Note A: Live Stock.—Includes history, development, characteristics, standard points, utility, features of resemblance and difference, adaptability to climatic conditions, lessons on judging, care, selection and management of each of the leading breeds of horses and sheep.

Note B: Live Stock.—Same as above, with reference to cattle and hogs, instead of horses and sheep.

Note C: Practical Agriculture.—Includes growth of crops, rotations, minerals in plant economy, harvesting, ensilage, irrigation, sewage, pastures, fields, observations, etc.

Note E: Stock Breeding.—Includes breeding as an art, heredity, atavism and reversion, laws of correlation, variation and fecundity, influence of parents and previous breeding, sex, pedigree, form, selection, period of gestation.

Note F: Farm Drainage.—Includes practical effect of drainage, lands needing drainage, preliminary and topographical survey, involving the different problems of drainage, engineering, map-drawing, calculating depth of drains and capacity of pipes, laying and preserving drains intact.

Note G: Seeds and Grasses.—Includes a comprehensive study in the laboratory of a large number of native, as well as introduced foreign plants, with reference to their identification, and to familiarize the student with the more common weed, seed of which form the basis of adulteration in our forage crops.

DAIRYING.

FIRST YEAR.—Aside from the scientific work in the Dairy, each student is required to master the following points:

1. The cleaning and ventilating of dairy barns, six weeks. Grooming and bedding of cows.
2. Milking and recording the same, six weeks. Feeding and care of cows and calves, eight weeks.
3. Destruction of ticks, lice, etc., eight weeks. Pasturing, six weeks.

SECOND YEAR.—1. Individual study of different breeds in the dairy herd, eight weeks. Breeding and feeding, eight weeks.

2. Treatment when sick, four weeks. Special study of cooked and uncooked food, four weeks. Special study of dairy machinery, feed cutters, grinders and steam power, four weeks.

3. Dairy possibilities of the State, six weeks. Dairy barns and co-operative dairies. Special study of dairy business methods.

MARKET GARDENING.

Special stress is laid upon this important line of work:

- FIRST YEAR.—1. Kinds and care of tools, plowing, spading and preparation of seed beds, six weeks.
2. Construction and care of hot-beds, six weeks.
 3. Planting and transplanting, twenty weeks. Intensive cultivation, eight weeks.

SECOND YEAR.—1. Growing vegetables in winter, twenty weeks.

2. Care and preparation of vegetables for market, twelve weeks.

3. Preservation of root crops, and cold storage, eight weeks.

PRACTICAL AGRICULTURE.

In connection with the sciences relative to agriculture, the student must master the following points under a competent instructor:

1. Kinds, care and uses of tools and instruments, ten weeks.
2. Preparation of sand, loam, clay and peaty soils, five weeks.
3. Testing seeds; time and depth of planting, six weeks.
4. Transplanting by hand and other methods; cultivation, six weeks.
5. Destruction of insects and fungus; diseases; use of improved machinery.
6. Fence-building; harvesting, housing and rotation of crops, farm economics, five weeks.

STOCK-RAISING.

FIRST YEAR.—Practical instruction will be given along the following lines: (See A and B), twelve weeks.

1. Feeding, breeding, grooming and treatment while sick; sixteen weeks.
2. Harness; kinds, care and use; eight weeks.

SECOND YEAR.—1. Instruction in this division as per Note E; sixteen weeks.

2. Vehicles; kinds, care and use; eight weeks.
3. Butchering, twelve weeks, including a study of beef, mutton and pork breeds, especially adapted to the South; cutting and preparing for market.

BEE-CULTURE.

Bee culture has been begun with marked success, and it is hoped it will soon prove profitable as well as instructive. The climate of Alabama is very favorable for this industry. An apiary of nearly one hundred colonies has already been collected.

HORTICULTURE.

All students of the Agricultural Department are required to acquaint themselves thoroughly with the following points:

FIRST YEAR.—1. Kinds, care and uses of tools; six weeks. The importance of fruit culture; six weeks.

2. Special attention is given to the following fruits: Apples, pears, quinces, figs, grapes, plums, peaches, cherries, strawberries, gooseberries, blackberries, etc.; fourteen weeks.

3. Deciduous, evergreen and ornamental trees, and their importance for shelter belts. Special attention is given to the value of native material. Fourteen weeks.

SECOND YEAR.—1. Laying off parks and private grounds, walks, streets, and pruning; twelve weeks.

2. Orchard gardening and forestry; twelve weeks.

3. Budding, grafting, layering, inarching, cross-fertilization, hybrids, sports, and special direction for packing, marketing and general care of fruits, etc.; sixteen weeks.

4. Library work includes the classification of a library, the making of important digests and abstracts from important books, bulletins and papers.

AGRICULTURAL EXPERIMENT STATION.

At the session of the State Legislature of Alabama, of 1896, a bill was passed providing for the establishment and location of a State Experiment Station in connection with this institution. The following Board of Regents has control of the Station: Hon. R. R. Poole, Montgomery; Messrs. George W. Campbell, Chas. W. Hare, Lewis Adams, Booker T. Washington and Warren Logan, Tuskegee. The Station Staff is composed of the Director and Instructors of the Agricultural Department of the Institute. The following is the act passed creating the Station:—

An act to establish a branch Agricultural Experiment Station for the colored race, and to make appropriations therefor:

SECTION 1. Be it enacted by the General Assembly of Alabama, That a Branch Agricultural Experiment Station and Agricultural School for the colored race, is hereby established and located at Tuskegee, Macon county, Alabama, to be run in connection with Tuskegee Normal and Industrial Institute, and to be known as the Tuskegee Agricultural Experiment Station and Agricultural School.

SECTION 2. Be it further enacted, That the Board of Control of said Station and School, shall be composed of the State Commissioner of Agriculture, the President of the A. & M. College and the Director of the State Experiment Station at Auburn, Alabama, and the members of the Board of Trustees of the Tuskegee Normal and Industrial Institute who reside in the town of Tuskegee, Alabama. The members of said Board shall not receive any compensation, other than expenses actually incurred in visiting the Station and School, and while there supervising its affairs.

SECTION 3. Be it further enacted, That for the equipment and improvement of said Station and School, there is hereby appropriated out of the agricultural fund in the treasury, not otherwise appropriated, the sum of fifteen hundred dollars; one-fourth of said

sum to be paid quarterly, to-wit; January 1st, April 1st, July 1st and October 1st; to the Treasurer of said Board of Control, who shall give bond in double the amount of appropriation, for the safe-keeping and faithful application of the sum appropriated, the bond to be approved by the Judge of Probate of Macon County, Alabama, and filed in his office, a certified copy of which shall be forwarded to the Commissioner of Agriculture, to be placed on file in his office.

SECTION 4. Be it further enacted, That the Trustees of the said Tuskegee Normal and Industrial Institute shall furnish for the use of said Station and School, all the necessary lands and buildings, and that for such use they shall make no charge against the State of Alabama.

SECTION 5. Be it further enacted, That the Board of Control must cause such experiments to be made at said Station as will advance the interests of scientific agriculture, and to cause such chemical analyses to be made as are deemed necessary, all such analysis, if requested, to be under the supervision of the Commissioner of Agriculture, by the chemist of the Agricultural Department, without charge.

SECTION 6. Be it further enacted, That said Board of Control may adopt such rules and regulations as they may deem necessary for the purpose of carrying out the provisions of this act, so that the colored race may have an opportunity of acquiring intelligent, practical knowledge of agriculture in all its various branches.

SECTION 7. Be it further enacted, That it is the purpose of this act to appropriate to the support of the Experiment Station established by this act; the sums appropriated in this act are appropriated only for the purpose of maintaining and operating Experiment Stations, with the view of educating and training colored students, as herein named, in scientific agriculture.

Approved, by the Governor, February 15th, 1897.

Catalogue of Students.

IN THIS LIST ARE NOT INCLUDED THE NAMES OF THOSE STUDENTS WHO WERE DISMISSED OR WITHDRAWN AT THE REQUEST OF THE EXECUTIVE COUNCIL DURING THE SCHOLASTIC YEAR.

POST-GRADUATES.

Crittenden, Mary Elizabeth.....(Nurse-training) Salisbury, N. C.
 Duncan, Ellen Kathleen.....(Nurse-training) Clonmen, Jamaica.
 Evans, Joseph James...(Architectural Drawing) Meridian, Miss.
 Greenlee, Margaret Jeannette...(Nurse-training) Asheville, N. C.
 Graham, Henry Lofton.....(Brickmasonry) Columbia, Tenn.
 Harris, Leonora Annetta.....(Dressmaking) Tuskegee, Ala.
 Kemp, James Horace.....(Tailoring) Horse Creek, Ala.
 Richardson, Zula Caroline.....(Nurse-training) Jefferson, Tex.
 Spurlock, Albert Claiborne.....(Machinery.) St. Albans, W. Va.
 Woodford, Richard Bush.....¹⁰.....(Agriculture) Berea, Ky.

SPECIAL STUDENTS.

Burton, William Emige.....Tuskegee, Ala.
 Davis, Euphemia Alphonze,.....Montgomery, Ala.
 Yarborough, Sarah Violet.....³.....Columbus, Ga.

SENIOR CLASS.

Adams, Theresa Belle.....Tuskegee, Ala.
 Bailey, William Ulysses.....Henderson, Ky.
 Barnes, Jesse Ryland.....Tuscaloosa, Ala.
 Booher, William John Henry.....Winter Park, Fla.
 Breedlove, Mary Jane.....Tuskegee, Ala.
 Chisholm, Frank Pierce.....Savannah, Ga.
 Crutcher, William Harris.....Harrodsburg, Ky.

CLASS 1900.

✓ Adams, Martha Norman.....	Tuskegee, Ala.
Taking post-graduate course in millinery, Tuskegee Institute.	
✓ Austin, Thomas.....	Key West, Fla.
Teaching. Printer.	
✓ Allen, Viola Marie.....	Macon, Ga.
Clerk, Grocery Store.	
✓ Bragg, Jubie Barton.....	Birmingham, Ala.
Working at trade, blacksmithing.	
✓ Bright, Richard.....	Kowaliga, Ala.
In charge, wheelwright shop, Kowaliga Industrial Institute.	
✓ Burks, Allan Lynn.....	Lome, Togo, Africa.
Introducing cotton-raising, under direction of the German Government.	
✓ Clark, John Wesley.....	Tuskegee, Ala.
Journeyman Tinsmith, Tuskegee Institute.	
✓ Dotson, Mary Louise.....	Tuskegee, Ala.
In charge, Division of Cooking, Tuskegee Institute.	
✓ Fairchild, Robert Clifton.....	Houston, Tex.
Working in Clothing Store.	
✓ Fuller, Richard Sylvester.....	Columbus, Ga.
Working in Grocery Store.	
✓ Griffin, Moselle Daisy.....	Uniontown, Ala.
Teacher, Uniontown District Academy.	
✓ Howard, Maggie Estelle.....	Nashville, Tenn.
Student in pharmacy, Meharry Medical College.	
✓ Hill, Richard.....	Tuskegee, Ala.
Student, Howard University.	
✓ Hahn, Rebecca.....	Tuskegee, Ala.
Taking post-graduate course, laundering, Tuskegee Institute.	
✓ Jackson, Roberta Irene.....	Daisy, Ga.
Teaching.	
✓ Jones, Thornton Mervyn.....	Tuskegee, Ala.
Instructor in baking, Tuskegee Institute.	
✓ King, Samuel Anderson.....	Tuskegee, Ala.
Taking post-graduate course, blacksmithing, Tuskegee Institute.	
✓ Lovette, Charles Sumner.....	Tuskegee, Ala.
Working at trade, brickmasonry.	
✓ McFarlin, Charles Edward.....	Pensacola, Fla.
Teaching.	
✓ McCoy, Houston Miller.....	Giddings, Tex.
Conducting tailoring establishment.	
✓ McDuffie, Joseph Theodore.....	Waverly Hall, Ga.
Teaching public school.	

- ✓ Menafee, Martin Asabee Denmark, S. C.
Treasurer, Denmark Industrial Institute.
- ✓ Moten, Pierce Tuskegee, Ala.
Drug clerk, Tuskegee Institute.
- ✓ Middlebrooks, George Washington Hamilton, Ga.
Died, Summer, 1900.
- ✓ Miller, Gabriel B. Ft. Valley, Ga.
Superintendent of Industries, Ft. Valley Industrial School.
- ✓ McKinney, Claude Ellsworth Vicksburg, Miss.
Second steward, river steamer.
- ✓ McWilliams, Lewis Harriman, Tenn.
Superintendent of Industries, East Tennessee Normal and Industrial Institute.

Olver Winfield Page.....	1900.
BLACK-SMITHING :	
James M. Canty.....	1890.
LaFayette Wilson.....	1894.
Edward W. Cummings.....	1895.
John J. Goodwire.....	1895.
Luther Van Hoose.....	1896.
LaFayette Vesper Simpson.....	1900.

*Deceased.

CANNING :

Moses B. Lacy.....1896.

CARPENTRY :

Julius E. Webster.....	1892.
John H. Michael.....	1892.
John H. Calloway.....	1892.
Percy L. Dorman.....	1895.
Shepherd L. Harris.....	1895.
Galveston Lovejoy.....	1896.
Willis N. Pitts.....	1896.
Elijah N. Faulkner.....	1897.
William S. Little.....	1897.
Jas. A. Mitchell.....	1897.
Charles Sumner Bowman.....	1898.
Bernard James Nesbitt.....	1898.
Pinkston Howard.....	1899.
Gabriel Bonaparte Miller.....	1900.

COOKING :

Mary Ella Patterson (Mrs. W. H. Holtzelaw).....	1893.
Laura E. Mabry.....	1895.
Laura Bennette (Mrs. C. D. Menafee).....	1895.
Annie L. Patterson.....	1895.
Lizzie S. Browning.....	1895.
Mary D. Harris.....	1895.
Eugenia Thweatt.....	1895.
Lavinia E. DeVaughn.....	1895.
Carrie Verdelle Harrison (Mrs. J. J. Goldwrie).....	1895.
Katie L. Carter.....	1896.
*Mary L. Greene.....	1896.
Katie L. Foster (Mrs. Katie Smith).....	1896.
Elizabeth A. Durgan.....	1896.
Eva B. Glenn (Mrs. F. E. Saffold).....	1896.
Emma D. Banks.....	1897.
Louisa C. Davis.....	1897.
Danella E. Foote.....	1897.
Nellie L. Griffin.....	1897.
Lidya C. Robinson.....	1895.
Ada E. Fisher.....	1897.
Dorrence Herbert (Mrs. R. T. Martin).....	1897.
Mary L. McCrary.....	1897.
Beatrice L. Stewart.....	1897.
Mary E. Thomas.....	1897.
Jemima M. Pierce.....	1898.
Luey L. Clopton.....	1898.
Emma T. Nesbitt (Mrs. H. G. Maberry).....	1898.
Elizabeth F. Roane.....	1898.
Esther L. Spies.....	1898.
Florine Patterson.....	1899.
Annie Henderson.....	1899.
Mary Louise Dotson.....	1900.

*Deceased.

	Minnie Morgan Nesbitt.....	1900.
DRESS-MAKING:		
	Hattie A. Davidson (Mrs. Eugene Hutt).....	1893.
	Mary W. Blandon (Mrs. Lockhart).....	1894.
