T. State Normal School

GENERAL INFORMATION

1881-1882

CALENDAR

The ~~school began its first session July 4, 1881 and continues~~ till March 30, 1882 nine months. Hereafter, the school will open the term which is 9 mo. first Monday In September and ~~continue in session nine months, closing~~ long began the ends the last Thrusday in May. Vacation from the last of May till the first of September. Students are expected to enter promptly at the beginning of the term. Applicants for admission must be present for examination The first Monday.

By communicating with the Principal, those unable to be present at the opening examination may have special arrangements made for their entrance.

CONDITIONS OF ADMISSION

For entrance to the Junior Class, students must be able to pass a satisfactory examination in reading, ~~and in arithmetic through long~~ division. writing & the fundamental rules of arithmetic.

Students able to read and write and having some knowledge of arithmetic, but who are not able to pass the examination for the Junior Class will be admitted to a Preparatory Class.

All applicants before admission must be fourteen years of age and must pledge themselves to teach two years in the public schools of this State after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character.

EXPENSES

During the last year a new building has been completed intended for academical purposes, as a dormitory for young women.

Board can be obtained at from six to eight dollars per month. Those desiring to board themselves can obtain furnished rooms and have their cooking done at from two to three dollars.

Students will have no other expenses except for books, as the State pays for teaching.

T. State Normal Schl
1881-1882

ADVANTAGES

The school has the advantage of being situated near the center of the State, in one of ~~the~~ its most healthy and cultivated towns ~~of the State~~, and can be easily reached by rail road. It is undenominational, but students are expected to attend church and Sabbath school. They are at libert to schoose their own place of worship.

Through the generosity of friends, the Trustees have been fortunate in securing a ~~farr~~ farm of one hundred acres on the suburbs of the town, on which to locate the school. This farm ~~will be~~ is cultivated so as to supply labor, as far as possible, to those students unabel to meet their boarding expenses.

~~Means for purchasing tools, stock, &c., for beginning the cultivation of the farm have already been secured.~~

~~The prospects now are that suitable~~ new buildings for school purposes and dormitory our girls have been doing the past year will be erected on the farm by the beginning of another school year.

~~An~~ efforts ~~will be~~ are made to obatin schools as far as possible, for those students who are competent and who wish to teach during the summer vacation.

LIBRARY AND READING-ROOM

Since the beginning of the school ~~nearly three~~ over 5 hundred volumes have been donated to the library and additions are still being made.

A reading-room to which the students have access, is constantly well supplied with the best periodicals and paper.

THE LITERARY SOCIETY

The young men hold weekly a Literary Society, in which they have an opportunity for extemporaneous speaking and to acquaint themselves with parliamentary usages.

REGULATIONS

The rules governing the school are those which best promote the welfare and happiness of all.

The use of intoxicating drinks or tobacco is not tolerated.

1441-1882

Regular habits, as to study, rest and recreation, are required.

Students are not permitted to be absent from their homes at night except on Wednesday and Sunday nights.

Students are liable to have their names dropped for inability to master their studies, irregular attendance and for failure to couply with the regulations of the school.

HISTORY

The school was established by an act passed by the Legislature of the State of Alabama, in 1880, and was opened July 4, 1881. An annual appropriation of two thousand dollars, for the payment of teacher's salaries, was made at the time. In addition to this over eight hundred dollars have been raised, a part of which was given by friends of the school, and the remainder raised by efforts of the students. Five hundred dollars of this sum has gone towards the purchase of the farm.

since then $1000 has been added to the appropriation.

For further information, address

B.T. Washington, Principal,

Tuskegee, Alabama.

SUMMARY.

THE TUSKEGEE STATE NORMAL SCHOOL.

Located at Tuskegee, Alabama,

Will open on Monday, September 4th, 1893.

Those expecting to attend, should make an application early.

The large new building now completed, adds much to the advantages of the institution.

Females will be expected to board in the school building where they will be under the constant over sight of the teachers.

Young men can also board and room on the school grounds.

Board is furnished at cheapest rates and those not able to pay their entire board bill in cash will be given an opportunity to work out a part of it.

TUITION IS FREE TO ALL.

The increased appropriation from the state and generosity of individuals, enable the school to offer advantages in the way of boarding accomodations and conveniences for study that few schools in the state possess.

Parents putting their children in our care need have no fear for their safety in every way.

CONDITIONS OF ADMISSION.

In the model school connected with the normal, two regular teachers are employed under whom the students receive practical training as teachers.

Lectures on current topics are given throughout the course.

All applicants before admission must be fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character.

EXPENSES.

Boards can be obtained at from $6 to $8 per month. Board in the girls hall will be $8 including everything, but students will have an

GENERAL INFORMATION.

Calender.

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May. Vacation from the last of May to the first of September. Students are expected to enter promptly at the beginning of the term and to remain in school till the end of the session.

Applicants for admission must be present for examination the first Monday.

By communicating with the Principal, those unable to be present at the opening examinations may have special arrangements made for their entrance.

CONDITIONS OF ADMISSION.

For entrance to the Junior class, students must pass a statisfactory examination in reading, writing, and the fundamental rules of arithmetic.

Students able to read and write, and having some knowledge of numbers, but not able to pass the examination for the Junior Class, will be admitted to a preparatory Class.

All applicants before admission must be fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character.

EXPENSES.

Board can be obtained at from $6 to $8 per month. Board in the girls hall will be $8 including everything, but students will have an

opportunity to work out a part of this. Young men desiring to board themselves can secure furnished rooms and have their cooking done at from $2 to $3 per month. Young ladies coming from a distance will be expected to board on the grounds at the school boarding hall, otherwise the officers of the school can not be fully responsible for them.

The school hopes to be able to provide dormitories and board on the school grounds for the young men by next term. Students will have no expense except for board and books, as the State pays for tuition.

ADVANTAGES.

The school is situated near the center of the state in one of its most healthy and cultivated towns, which can be easily reached by railroad. It is undenominational, but students are required to attend church and Sabbath school. They are at liberty to choose their own place of worship.

Through the generosity of friends, the Trustees have purchased a farm of one hundred and forty acres in the suburbs of the town, on which the school is located. This farm is cultivated so as to supply labor, as far as possible, to those students who have not means to meet their boarding expenses.

A new building for school purposes, and boarding hall and dormitory for girls, has been erected on the farm during the past year.

Efforts are made to obtain schools as far as possible, for those students who competent who wish to teach during the summer vacation.

LIBRARY AND READING ROOM.

Since the beginning of the school over five hundred volumes have been donated to the library, and additions are still being made.

B. T. WASHINGTON, Principal,

Tuskegee, Alabama.

A reading room to which the students have access is constantly and well supplied with the best periodicals and papers.

THE LITERARY SOCIETY.

The young men ahve a Literary Society which holds weekly meetings in which they have opportunities for extemporaneous speaking, and of acquainting themselves with parliamentary usages.

REGULATIONS.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The use of intoxicating drinks or of tobacce is not tolerated.

Regular habits as to rest and recreation are required.

Students are not permitted to be absent from their homes or boarding places at night except on Wednesday and Sunday nights.

Students are liable to be dropped for inablility to master their studies, irregular attendance, or failure in complying with the other regulations.

HISTORY.

The school was established by an act of the Legislature of Alabama passed in 1880, and was opened July 4, 1881. An annual appropriation of two thousand dollars for the payment of tuition was made at the time. This appropriation has since been increased to three thousand dollars. In addition to this $6125.82 has been raised, a part of which was given by friends of the school and the remainder raised by entertainments given by the students, $575 of this went towards paying for the farm and $4942.17 towards the new building.

COURSE OF STUDY

The regular course of instruction extends through a period of four years.

JUNIOR YEAR

Language

Elocution.— Physical and vocal drill.

Orthography.— Spelling and dictation exercises (both written) and punctuation.

Composition.— Original composition, oral and written, including sentence making, writing business and friendly letters and composition on general topics; abstracts.

Grammar.— Analysis of sentences; parsing.

Mathematics.

Mental and written Arithmetic,— Mental, Analysis and numeral combinations; Written, Robinson's Practical Arithmetic from factoring to applications of denominate numbers.

Geometry

Study of lines and angles and common forms of surfaces and solids.

Geography

Study of natural and political divisions of land and water, commercial geography, special study of the geography and history of Alabama, and map drawing.

History

History, and outline of the form of government of the United States. Lives and characters of prominent persons connected with each period.

Writing.

Spencerian copy-books.

CALISTHENICS

VOCAL MUSIC

B. MIDDLE YEAR.

Language

Elocution.— Physical and vocal drill, phonetics, and examples and definitions of different qualities of voice.

Orthography.— Written spelling and dictation exercises, and punctuation

Composition.—Oral and written including writing and telling simple stories, writing business and friendly letters, composition on general topics, and abstracts.

Grammar.— Analysis and parsing: simple figures of speech.

Mathematics.

Mental and Written Arithmetic and Algebra.

Geometry

Mathematical and Physical.—First half of the year.

Astronomy

Simple lessons in, during the last half of the year. Text, Lockyer's Science Primer.

History

Universal—Outline of Physiology and Hygiene.

Vocal Music

Writing

Spencerian copy-books.

Calisthenics.

A Middle Year

Elocution
Orthography — Language
Composition,—Oral and written
Rhetoric.

Literature

Study of lives and principal works of American authors.

Mathematics.

Written Arithmetic and Algebra.— Completed.

Geometry

Geometrical Drawing

Free-Hand Drawing

Natural Philosophy

History

Review of American history in connection with contemporary English

Zoology and Botany

Elementary lessons in.

Vocal Music

Calisthenics.

SENIOR YEAR.

Literature

Study of lives and works of English authors.

Mathematics.

Review of arithmetic; book-keeping.

Geometry

Free-Hand Drawing

Methods of Teaching

Civil Government.

Special study of the constitution of the United States, and of the school laws of Alabama.

Chemistry.

Mental and Moral Philosophy

Calisthenics

Vocal Music.

In the model school connected with the normal, two regular teachers are employed under whom the students receive practical traning as teachers. Lectures on current topics are given throughout the course.

GENERAL INFORMATION

Calendar

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May.

Vacation from the last of May to the first of September. Students are expected to enter promptly at the beginning of the term and remain in school till the end of the session.

Applicants for admission must be present for examination the first Monday.

By communication with the Principal, those unable to be present at the opening examination may have special arrangements made for their entrance.

CONDITION OF ADMISSION.

For entrance to the Junior class, students must pass a satisfactory examination in reading, and the fundamental rules of arithmetic.

Students able to read and write, and having some knowledge of numbers, but not able to pass the examination for the Junior class will be admitted to the Preparatory Class.

All applicants for admission must be at least fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character.

EXPENSES.

Tuition is free, being provided for by the State. The institution charges $8.00 per month for board, including washing, clothes mending, lights, etc.

Able-bodied young men and women work out, on an average, $3 per month, thus leaving only $5 per month to be paid in cash.

Students' labor must be satisfactory in order to be accepted as part payment of board bills.

Books must be paid for in cash. Money to pay board bills should be sent to the Principal directly and not to the student.

Remittance may be made by money order, registered letter, check or by express.

All non-resident students are expected to board at the school unless there is some good reason for their not doing so.

Students who need under-garments will find it to their advantage not to purchase such garments before coming here, as the institution will supply under-garments, &c., from the girls' industrial room at about cost prices.

ADVANTAGES.

The school is situated near the center of the State in one of its most healthy and cultivated towns, and can be easily reached by railroad.

It is undernominational, but students are required to attend church and Sabbath school. They are at liberty to choose their own place of worship. A regular weekly prayer meeting is held which all are required to attend. Efforts are made to obtain schools as far as possible for those students who are competent and wish to teach during the summer vacation.

LIBRARY AND READING ROOM.

There are seven hundred volumes in the library and additions are constantly being made. It is accessible to all. The Reading Room is furnished with the best journals and periodicals.

Students are required to give items of current news every morning.

THE LITERARY SOCIETIES.

The young men have two Literary Societies which hold weekly meetings. in which they have opportunities for extemporaneous speaking, and of acquainting themselves with parliamentary practices.

REGULATIONS.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The use of intoxicating drinks and tobacco, is forbidden.

Regular habits as to rest and recreation are required.

Students are liable to be dropped for inability to master their studies, irregular attendance or failure in complying with the other regulation.

WORK

Work is required of all for purpose of discipline and instruction, and of teaching the dignity of labor.

A few students, with no money, work all day and attend night school. In this way they earn money with which to pay their taxpenses in the day school the succeeding term.

There are hundreds of institutions, North and South, to which students can go and receive extended mental training, but those where young men and women can learn a trade in addition to other training, are few. At present the industries of the institution are farming, brick-making, carpentering, printing, black-smithing; and house-keeping and sewing for girls.

To these the institution expects to add tin-smithing, shoe-making, painting, broom-making etc.

For the impetus given to the industrial department of the school, it is indebeted chiefly to the "John F. Slater Fund."

This department is carried on with almost no loss to the student in his classes.

STATEMENT.

The Tuskegee Normal School was established by an act of the Legislature of Alabama. passed in 1880, and was opened in a church July 4th, 1881, with 30 students and 1 teacher.

In the same year that the school was opened, the present location (consisting then of 100 acres of land and 3 small buildings,) was paid for by the friends of the school outside of the State appropriation.

The corner stone of the present large building (Porter Hall) was laid at the close of the first session, and the building was completed during the second session at a cost of $6,000.

The school is now in its third session and has 10 officers and teachers, and an enrollment of 169 students, representing nearly every county in Alabama, and 3 States.

The appropriation of $2,000 annually made by the State Legislature at first for the support of the school, was increased at the last session of the Legislature to $3,000 annually.

The State appropriation is used almost entirely to pay tutition.

For money for buildings, land, &c. , the school looks to its friends North and South. The property is deeded to a Board of Trustees.

During the 3 years that the school has been in session the following amounts have been collected:

For proposed new building (Alabama Hall, to cost $10,000) collected	$6,000.00
For Building (Porter Hall)	$6,000.00
For Farm	$1,050.00
For Beneficiary Fund	$165.00
For General Expenses	$470.00
For Freight	$55.00
For Furniture	$90.00
For Special purposes	$220.00
From Peabody Fund	$500.00
From John F. Slater Fund (for industries)	$1,110.00
From Students for board (about)	$2,000.00
Total outside of State appropriation	$17,650.00
State Appropriation (3 years)	$7,000.00
Total (with State appropriation).....	$24,650.50

Including the donations of materials and the improvements made, it is safe to put the value of the property and cash in the hands of the institution at $30,000.

The entire property is free from debt.

LAND

To the 100 acres of land with which the school started, a friend in Connecticut recently added an adjoining tract of 480 acres, making the total amount of farming and wood land owned by the school 580 acres.

A NEW BUILDING TO BE CALLED ALABAMA HALL.

Ground has been broken for Alabama Hall and $6,000 of the $10,00 which it is to cost, has been raised.

The students are now using a machine in the making of bricks for the erection of the building which will be completed next term.

This is to be a brick building 43 x 76, four stories high and is to contain besides dormitories for girls, a dining-room, kitchen, laundry, palor, reading-room and library for all the students and teachers.

As soon as this building is completed, the young men, now in temporary quarters, are to occupy Porter Hall.

IN GENERAL

County Superintendents wanting competent teachers will be sure of securing them by corresponding with the Principal.

COURSE OF STUDY

The regular course of instruction extends through a period of four years.

JUNIOR YEAR

Language

Elocution.—Physical and vocal drill.

Orthography.— Spelling and dictation exercises (both written) and punctuation.

Composition.—Original compostition, oral and written including sentence making, writing business and friendly letters and composition on general topics; abstracts.

Grammar.— Analysis of sentences; parsing.

Mathematics.

Mental and Written Arithmetic.—Mental, analysis and numeral combinations; Written, Sanford's Analytical Arithmetic, from factoring to applications of denominate numbers.

Geometry

Study of line and angles, and common forms of surfaces and solids.

Geography

Study of natural and political divisions of land and water, commercial geography, special study of the geography and history of Alabama, and map drawing.

History

History, and outline of the form of government of the United States. Lives and characters of prominent persons connected with each period.

Writing

Spencerian copy-books.

Calisthenics.

B. MIDDLE YEAR

Language

Elocution.—Physical and vocal drill, phonetics, and examples and definitions of different qualities of voice.

Orthography.—Written spelling and dictation exercises, and punctuation.

Composition.—Oral and written, including writing and telling simple stories, writing business and friendly letters, composition on general topics, and abstracts.

Grammar.—Analysis and parsing: simple figures of speech.

Mathematics.

Mental and written Arithmetic and Algebra

Geometry

Inventional—Text, Spencer's Science Primer.

Geography

Mathematical and Physical.—First half of the year.

Astronomy

Simple lessons in, during the last half of the year. Text, Lockyer's Science Primer.

History

Universal,—Outline of.

Physiology and Hygiene.

Vocal Music

Writing

Spencerian copy-books,

Calisthenics.

A. MIDDLE YEAR

Language

Elocution
Orthography
Composition,—Oral and written
Rhetoric
Written Arithmetic and Algebra,—Mathematics completed.

GEOMETRY

Geometrical Drawing

Free-Hand Drawing

Natural Philosophy

History

Revies of American History in connection with contemporary English.

Zoology and Botany.

Elementary lessons in.

Vocal Music

Calisthenics.

SENIOR YEAR

Literature

Study of lives and works of English And American Authors.

Mathematics

Review of Arithmetic: book-keeping.

Geometry

Free-Hand Drawing

Methods ofTeaching

Civil Government.

Special study of the constitution of the United States and of the school laws of Alabama.

Chemistry

Mental and Moral Philosophy

Calisthenics

Vocal Music

In the model school connected with the normal, two regular teachers are employed under whom the students receive practical training as teachers.

Lectures on current topics are given throughout the course.

GENERAL INFORMATION

Calendar

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May.

Vacation from the last of May to the first of September. Students are expected to enter promptly at the beginning of the term and remain in school till the end of the session.

Applicants for admission must be present for examination the first Monday.

By communication with the Principal, those unable to be present at the opening examination may have special arrangement made for their entrance.

CONDITION OF ADMISSION.

For entrance to the Junior Class students must pass a satisfactory examination in reading, writing, and the fundamental rules of arithmetic.

Students able to read and write, and having some knowledge of numbers, but not able to pass the examination for the Junior Class, will be admitted to the Preparatory Class.

All applicants for admission must be at least fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character.

EXPENSES.

Tuition is free, being provided for by the State. The institution charges $8.00 per month for board, including washing, clothes mending, lights, etc.

Able-bodied young men and women work out, on an average, $8.00 per month, thus leaving only $5.00 per month to be paid in cash.

Students' labor must be satisfactory in order to be accepted as part payment of board bills.

Books Must be paid for in cash. Money to pay board bills should be sent to the Principal directly and not to the student.

Remittance may be made by money order, registered letter, check, or by express.

All non-resident students are expected to board at the school unless there is some good reason for their not doing so.

Students who need under-garments will find it to their advantage not to purchase such garments before coming here, as the institution will supply under-garmenst, etc., from the "Girls" Industrial Room" at about cost prices.

ADVANTAGES

The school is situated near the center of the State in one of its most healthy and cultivated towns, and can be easily reached by railroad.

It is undenominational, but students are required to attend church and Sabbath school. They are at liberty to choose their own place of worship.

A regular weekly prayer meeting is held which all are required to attend, Efforts are made to obtain schools for those students who are competent and wish to teach during summer vacation.

LIBRARY AND READING ROOM.

There are eight hundred volumes in the library and additions are consantly being made. It is accessible to all. The Reading Room is furnished with the best journals and periodicals.

Students are required to give items of current news every morning.

THE LITERARY SOCIETIES.

The young men and young ladies each have Literary Societies which hold weekly meetings, in which they have opportunities forextemporaneous speaking, and of acquainting themselves with parliamentary practices.

REGULATIONS.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The use of intoxicating drinks and tobacco, is forbidden.

Regular habits as to rest and recreation are required.

Students are liable to be dropped for inability to master their studies, irregular attendance or failure in complying with the regulations of the school.

WORK

Work is required of all for purposes of discipline and instruction, and of teaching the dignity of labor.

NIGHT SCHOOL.

A few students, with no money, work all day and attend night school. In this way they earn money with which to pay their expenses in the day school the succeeding term. They are paid a regular price per month for their work.

There are hundreds of institutions, North and South, to which students can go and receive extended mental training, but those where young men and women can learn a trade in addition to other training, are few. At present the industries of the institution are farming, brick-making, carpentering, printing, black-smithing, painting, stock and poultry raising and house-keeping and sewing for girls.

To these the institution expects to add tin-smithing, shoe-making, etc.

For the impetus given to the industrial department of the school, it is indebted chiefly to the "John F. Slater Fund."

This department is carried on with no loss to the student in his classes.

STATEMENT.

The Tuskegee Normal School was established by an act of the Legislature of Alabama, passed in 1880, and was opened in a church July 4th, 1881, with 30 students and 1 teacher.

In the same year that the school was opened, the present location (consisting then of 100 acres of land and 3 small buildings,) was paid for by

the friends of the school outside of the State appropriation.

The corner stone of the present large building (Porter Hall) was laid at the close of the first session, and the building was completed during the second session at a cost of $6,000.

The school is now in its fourth session and has 13 officers and teachers, and an enrollment of 205 students, representing nearly every county in Alabama, and 4 States.

The appropriation of $2,000 annually, made by the State Legislature, at first, for the support of the school, was increased at the session of 1883 to $3,000 annually.

The State appropriation is used almost entirely to pay tuition.

For money for buildings, land, &c., the school looks to its friends North and South. The property is deeded to a Board of Trustees.

During the 4 years that the school has been in session, the following amounts have been collected:

For Building (Porter Hall)	$6,500.00
For Alabama Hall	$9,000.00
For Farm	$1,5000.00
For Beneficiary Fund	$200.00
For General Expenses	$900.00
For Freight	$75.00
For Furniture	$500.00
For Special Purposes	$220.00
From Peabody Fund	$500.00
From John F. Slater Fund, (for industries,)	$2,100.00
From Students for Board (about)	$5,000.00
Total outside of State appropriation	$26,495.00
State appropriation (4 years)	$10,000.00
Total (with State appropriation)	$36,495.00

Including the donations of materials and the improvements made, it is safe to put the value of the property and cash in the hands of the institution at $40,00.

The entire property is free from debt.

LAND.

To the 100 acres of land with which the school started, a friend in Connecticut recently added an adjoining tract of 480 acres, making the total amount of farming and wood land owned by the shool 580 acres.

ALABAMA HALL.

"Alabama Hall", it is hoped, will be ready for occupancy at the opening of school in September.

This is a brick building 43 x 76, four stories high and contains besides dormitories for 100 girls' a dining room, kitchen, parlor, reading-room, and library for all the students. The young men now in temporary quarters will occupy Porter Hall on completion of the new building.

IN GENERAL.

County Superintendents wanting competent teachers will be sure of securing them by corresponding with the Principal.

Mental and Moral Philosophy

Calisthenics.

Vocal Music

In the model school connected with the normal, two regular teachers are employed, under whom the students receive practical training as teachers.

Lectures on current topics are given throughout the course.

GENERAL INFORMATION

CALENDAR

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May.

Vacation from the last Thursday of May to the first Monday of September. Students are expected to enter promptly at the beginning of the term and remain in school till the end of the session.

Applicants for admission must be present for examination the first Monday.

By communication with the Principal, those unable to be present at the opening examination may have special arrangement made fortheir entrance.

CONDITIONS OF ADMISSION

For entrance to the JUNIOR CLASS students must pass a satisfactory examination in reading, writing, and the fundamental rules of Arithmetic.

Students able to read and write, and having some knowledge of numbers, but not able to pass the examination for the JUNIOR CLASS, will be admitted to the PREPARATORY CLASS.

All applicants for admission must be at least fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character.

EXPENSES.

Tuition is free, being provided for by the State. The institution charges $8.00 per month for board, including washing, clothes mending, lights, etc.

Students' labor must be satisfactory in order to be accepted as part payment of board bills.

Books must be paid for in cash. Money to pay board bills should be

sent to the Principal or Treasurer directly, and not to the student. Remittance may be made by money order, registered letter, check of by express.

All non-resident students are expected to board at the school unless there is some good reason for their not doing so.

Students whoo need under-garments will find it to their advantage not to purchase such garments before coming here, as the institution will supply under-garments, etc, from the "Girls' Industrial Room" at about cost prices.

The school has decided that the male students shall be uniformed.--as soon as it is practicable. Exactly what the uniform shall be has not yet yet been determined.

Arrangements are making by which the school will be able to furnish uniforms from the "Girls' Industrial Room" at bare cost of material and manufacture.

ADVANTAGES.

The school is situated near the center of the State in one of its most healthful and cultivated towns, and can be easily reached by railroad.

It is undenominational, but students are required to attend church and Sabbath school. They are at liberty to choose their own place of worship.

A regular weekly prayer meeting is held all are required to attend. Efforts are made to obtain schools for those students who are competent and wish to teach during the summer vacation.

LIBRARY AND READING ROOM.

There are two thousand volumes in the library and additions are constantly being made. It is accessible to all. The Reading Room is furnished with the best journals and periodicals.

Students are required to give items of current news every morning.

THE LITERARY SOCIETIES.

The young men and young women, each, have Literary Societies which hold weekly meetings, in which they have opportunities for extemporaneous speaking, and acquainting themselves with parliamentary practices.

REGULATIONS.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The use of intoxicating drinks and tobacco, is forbidden.

Regular habits as to rest and recreation are required.

Students are liable to be dropped for inability to master their studies, irregular attendance, or failure in complying with the regulations of the school.

WORK

Work is required of all for purposes of discipline and instruction, and of teaching the dignity of labor.

NIGHT SCHOOL.

A few students, with no money, work all day and attend night school in this way they earn money with which to pay their expenses in the day school the succeeding term. Those who enter as work students pledge the selves to work for a year from the time of their entrance. They are allowed a regular price for their work, and are permitted to draw from the Treasury from $1.50 to $3.00 per month, according to the amount they earn. The remainder of the monthly allowance is reserved by the Treasurer to meet their expenses of board, books, etc., when they join the day school.

If for any reason a work student leave school before the expiration of his term of service, he forfeits one half of what the school may owe him.

The object of the work class is to help those who belong to it, to secure an education, and not to make money.

Only able bodied, capable young men and young women who are eager for an education, need apply for admission to the Night School.

There are hundreds of institutions North and South, to which students can go and receive extended mental training, but those where young women and men can learn a trade in addition to other training, are few. At present the industries of the institution are farming, brick-making, carpentering, printing, black-smithing, painting, stock and poultry raising and house-keeping and sewing for girls.

To these the institution expects to add tin-smithing, shoe-making etc.

For the impetus given to the Industrial department of the school, it is indebted chiefly to the "John F. Slater Fund."

The industrial department is carried on with no loss to the student in his classes.

STATEMENT.

The Tuskegee Normal school was established by act of the legislature of Alabama, passed in 1880, and was opened in a church July 4th, 1881, with 30 students and 1 teacher.

In the same year that the school was opened, the present location (consisting then of one hundred acres of land and 3 small buildings,) was paid for by the friends of the school outside the State appropriation.

The corner stone of the present large building (Porter Hall) was laid at the close of the first session, and the building was completed during the second session at a cost of $6,000.

The school is now in its fifth session and has 17 officers and teachers, and an enrollment of 279 students, representing nearly every county in Alabama, and 5 States.

The appropriation of $2,000 annually, made by the State legislature,

at first, for the support of the school, was increased at the session of 1883 to $3,000 annually.

The State appropriation is used entirely to pay tuition.

For money for buildings, land, etc., the school looks to its friends North and South, The property is deeded to a Board of Trustees.

During the five years that the school has been in session the following amounts have been collected :

For building (pPorter Hall)	$6,5000.00
For Alabama Hall	$10,000.00
For Farm	$1,500.00
For Beneficiary Fund	$200.00
General Expenses	$10,000.00
Pro Freight	$100.00
For Furniture	$500.00
For Special Purposes	$1,200.00
From Peabody Fund	$900.00
From John F. Slater Fund	$3,000.00
From Students for Board, (about)	$8,000.00
Total outside of State appropriation	$41,900.00
State appropriation (5 years)	$13,000.00
Total with State appropriation	$54,900.00

Including the donations fo materials and the improvements made, it is safe to put the value of the property and cash in hand at $50,000.

The entire property is free from debt.

LAND

To the 100 acres of land with which the school started, a friend in Connecticut recently added an adjoing tract of 480 acres, making the total amount of farming and wood land owned by the school 580 acres.

ALABAMA HALL.

A labama Hall has been completed and is now being occupied.

This is a brick building 43 x 76, four stories high, and contains, besides dormitories for100 girls, dining room, kitchen, parlor, reading room and library for all the students. The young men now occupy Porter Hall, which, with a new brick cottage now in process of erection, will afford ample accommodations for all.

IN GENERAL

County Superintendents wanting competent teachers will be sure of securing them by corresponding with the Principal.

*** COURSE OF STUDY ***

The regular course of instruction extends through a period of four years.

JUNIOR YEAR

Language

Elocution.--Physical and vocal drill.

Orthography.--Spelling and dictation exercises (both written) and punctuation.

Composition.--Original composition, oral and written, including sentence making, writing business and friendly letters and composition on general topics; abstracts.

Grammar.--Analysis of sentences; parsing.

Mathematics.

Mental and Written Arithmetic.--Mental, Analysis and numeral combinations. Written, Sandford's Analytical Arithmetic, from factoring to applications of denominate numbers.

Geometry

Study of lines and angles, and common forms of surfaces and solids.

Geography.

Study of natural and political divisions of land and water, commercial geography, special study of the geography and history of Alabama, and map drawing.

History

History and outline of the form of government of the United States. Lives and characters of prominent persons connected with each period.

Writing

Spencerian copy-books.

Calisthenics

Vocal Music.

B MIDDLE YEAR

Elocution.—Physical and vocal drill, phonetics, and examples and definitions of different qualities of voice.

Orthography.—Written spelling and dictation exercises, and punctuation.

Composition.—Oral and written, including writing and telling simple stories, writing business and friendly letters, composition of general topics and abstracts.

Grammar.—Analysis and parsing: simple figures of speech.

Mathematics.

Mental and Written Arithmetic and Algebra.

Geometry

Inventional.—Text, Spencer's Science Primer

Geography

Mathematical and Physical.—First half of the year

Astronomy

Simple lessons in, during the last half of the year

History

Universal.—Outlines of

Physiology and Hygiene

Vocal Music

Writing

Spencerian copy-books

Calisthenics.

A MIDDLE YEAR

Language

Elocution
Orthography
Composition.—Oral and written
Rhetoric

Mathematics

Written Arithmetic and Algebra.—Completed.

Geometry

Geometrical Drawing

Free-Hand Drawing

Natural Philosophy

History

Review of American history in connection with contemporary English.

Zoology and Botany

Elementary lessons in

Vocal Music

Calisthenics

SENIOR YEAR

Literature

Study of lives and works of English and American authors.

Mathematics.

Review of Arithmetic; Book-Keeping

Geometry

Free-Hand Drawing

Methods of Teaching

Civil Government

Special study of the constitution of the United States, and of the school laws of Alabama.

Chemistry

Mental and Moral Philosophy

Calisthenics

Vocal Music

In the model school connected with the normal, two regular teachers are employed, under whom the students receive practical training as teachers.

Lectures on current topics are given throughout the course.

GENERAL INFORMATION

CALENDAR

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May.

Vacation from the last Thursday of May to the first Monday of September. Students are expected to enter promptly at the beginning of the term and remain in school till the end of the session.

Applicants for admission should be present for examination the first Monday in September.

By communication with the principal, those unable to be present at the opening examination may have special arrangement made for their

CONDITIONS OF ADMISSION

For entrance to the Junior Class students must pass a satisfactory examination in reading, writing, and the fundamental rules of Arithmetic.

Students able to read and write, and having some knowledge of numbers, but not able to pass the examination for the Junior Class, will be admitted to the Preparatory Class.

All applicants for admission must be at least fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral and character.

EXPENSES.

Tuition is free being provided for by the State and generous individuals.

The price of board including washing, lights, fuel, room rent, clothes mending etc., is $8.00 per month.

Students are given an opportunity to work out an averabe of $3.00

per month thus leaving only $5.00 to be paid in cash. Some work out one half their expenses.

Student labor must be satisfactory in order to be accepted as part payment for board bills. Students who are economical and willing to work rarely fail to find a way to remain in school here. Whatever students do no work out must be paid in cash.

With a good outfit of clothing $45, is sufficient cash to carry an able-bodied student through one school year (9 months).

The rate of wages is according to the age of the student and the real value of his work. The arrangements are such that students showing what he may owe the school or what the school may owe him. Parents should require their children to send their bills home.

When students do not settle their accounts by the 15th of the month they are liable to be suspended from their recitations until they are paid.

Books must be paid for in cash. Money to pay board bills should be sent to the Principal or Treasurer directly, and to the student. Remittance may be made by money order, registered letter, check, or by express.

All non-resident students are expected to board at the school unless there is some good reason for their not doing so.

Students who need under-garments will find it to their advantage not to purchase such garments before coming here, as the institution will supply under-garments, etc., from the "Girls" Industrial Room" at about cost prices.

The school has adopted as a uniform for the young men a dark blue suit--which will be furnished by the "Girls' Industrial Room" at bare cost of the material and manufacture. The cost of a uniform, (coat and pants,) will be about $13.00.

ADVANTAGES.

The school is situated near the center of the State in one of the most healthful and cultivated towns and can be easily reached by Railroad.

The institution is one mile from the center of the town and is situated on a farm of its own.

Those who wish to send their children to a place where they will not be surrounded by the temptations of a large city cannot find a better place than Tuskegee. At present there is only one bar-room in town and after Christmas there will be no whiskey sold in the county.

Tuskegee, is a quiet, retired town, just the place for study. It is 40 miles east of Montgomery and 5 miles from Chehaw Station on the Western Railroad with which it is connected by the Tuskegee Railroad. The Western Union Telegraph Co., has an office in Tuskegee, While it enjoys all the advantages of access that a large city does, it is at the same time far enough removed from the main line of travel to make it free from the danger of contagious diseases. The climate is so salubrious that is very seldon the case that the health of studeats is not greatly improved after a short residence.

HOME TRAINING.

The Home Training that students receive here is one of the most valuable parts of their education. It is our intention to give special attention to the training of girls in matters pertaining to dress, health etiquette, physical development and general house-keeping. The girls receive the constant and strict care of the matron and other lady teachers and are not permitted to go off the school grounds without being accompained by a teacher.

LIBRARY AND READING ROOM.

There are three thousand volumes in the library and additions are constantly being made. It is accessible to all. The Reading Room is furnished with the best journals and periodicals.

Students are required to give items of current news every morning.

LITERARY SOCIETIES.

The young men and young women, each have Literary Societies which hold weekly meetings, in which they have opportunities for extemporaneous speaking, and acquainting themselves with parliamentary practices.

REGULATIONS.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The use of intoxicating drinks and tobacco, is forbidden.

Regular habits as to rest and recreation are required.

Students are liable to be dropped for inability to master their studies, irregular attendance, or failure in complying with the regulations of the school.

Expensive clothing are not necessary nor does the institution want students to wear anything except good plain clothing.

It is well for parents to correspond with the matron regarding clothes for their daughters.

Every girl should come provided with a pair over shoes and a waterproof cloak.

WORK

Work is required of all for purposes of discipline and instruction, and of teaching the dignity of labor.

NIGHT SCHOOL.

A few students, with no money, work all day and attend night school. In this way they earn money with which to pay their expenses in the day school the succeeding term. Those who enter as work students, pledge themselves to work for a year for a year from the time of their entrance. They are allowed a regular price for their work and are permitted to draw from the Treasury from $1.00 to $2.00 per month, according to the amount they earn. The remainder of the monthly allowance is reserved.

by the Treasurer to meet their expenses of board, books, etc., when they join the day school.

Thoses who leave voluntarily or are discharged as unsatisfactory either in work or deportment forfeit three fourths of their cash earnings.

Night students are taken on two months' trail to test their physical and mental ability. Those entering the Night Class are advised to bring a good outfit of clothing from home, and make arrangements with their friends to be supplied with clothing during the term.

What the night students earn during the year added to their earnings while in the day school, and during the three months' vacation, ought to keep them in school for two years.

The object of the work class is to help those who belong to it, to secure an education, and not to make money.

Only able-bodied, capable young men and young women who are eager for an education, need apply for admission to the Night School.

There are hundreds of institutions North and South, to which students can go an receive extended mental training, but those where young men and women can learn a trade in addition to other training, are few. At present the industries of the institution are farming, brick-making, carpentering printing, black-smithing, painting, stock and poultry raising, and house-keeping and sewing for girls.

To these, the institution expects to add tin-smithing, shoe-making, etc.,

For the impetus given to the Industrial department of the school, it is indebted chiefly to the "John F. Slater Fund".

STATEMENT

The Tuskegee Normal School was established by act of the legislature of Alabama, passed in 1880, and was opened in a church July 4th, 1881, with 30 students and 1 teacher.

In the same year the school was opened, the present location (consisting then of one hundred acres if land and 3 small buildings,) was paid,

for by the friends of the school outside the State appropriation.

The corner stone of the large building (Porter Hall) was laid at the close of the first session, and the building was completed during the second session at a cost of $6,000.

The school is now in its sixth session and has 20 officers and teachers, and an enrollment of 294 students, representing nearly every county in Alabama, and 5 States.

The appropriation of $2,000 annually, made by the State legislature, at first, for the support of the school, was increased at the session of 1883 to $3,000 annually.

The State appropriation is used entirely to pay tuition.

For money for buildings, land, etc., the school looks to its friends North and South. The property is deeded to a Board of Trustees.

During the 5 years that the school has been in session, the following amounts have been collectd.

For Porter Hall	$6,500
For Alabama Hall	$10.000
For Farm	"$1,500
For Beneficiary Fund	$100
For General Expenses	$17,000
For Freight	$100
For Furniture	$500
For Special Purposes	$2,000
From Peabody Fund	$1,200
From John F. Slater Fund	$3,400
From Students for Board (about)	$9,200
Total outside of State appropriation-	$52,369
State Appropriation (6 years)	$16,000
Total with State appropriation	$68,369

Including the donations of materials and the improvements made, it is safe to put the value of the property and cash in hand at $65,000.

The entire property is free from debt.

LAND

To the 100 acres of land which the school started, a friend in Connecticut recently added an adjoining tract of 480 acres, making the total amount of farming and wood land owned by the school 580 acres.

BUILDINGS

Alabama Hall has been completed and is now being occupied.

This is a brick building 43 x 76, four stories high, and contains, besides dormitories for 100 girls, dining room, kitchen, parlor, reading room and library for all the students.

The new hall now in process of erection will afford more and better accommodations for the young men's sleeping quarters. It is our plan to have this ready for use at the beginning of the next term.

IN GENERAL

The institution already has facilities for teaching instrumental music. This department, we expect to improve next term so that every student who desires it can have the best training in instrumental music.

The school is undenominational, but students are required to attend church and Sabbath school. They are at liberty to choose their own place of worship.

A regular weekly prayer meeting is held which all are required to attend.

Efforts are made to obtain schools for those students who are competent and wish to teach during the summer vacation.

County Superintendents wanting competent teachers, will be sure of securing them by corresponding with the Principal.

For further information, Address;

B. T. Washington, Principal

Tuskegee, Alabama.

Free Hand Drawing

Calisthenics.

GENERAL INFORMATION

CALENDAR

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May.

Vacation is from the last Thursday of May to the first Monday of September. Students are expected to enter promptly at the beginning of the session and remain in school till its close.

Applicants for admission should be present for examination the first Monday in September.

By Communication with the Principal, those, unable to be present at the opening examination, may have special arrangement made for their entrance.

CONDITIONS OF ADMISSION.

For entrance to the Junior Class applicants must pass a satisfactory examination in reading, writing, and the fundamental rules of arithmetic.

Students able to read and write, and having some knowledge of numbers, but not able to pass the examination for the Junior Class, will be admitted to the Preparatory Class.

All applicants for admission must be at least fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character.

EXPENSES.

Tuition is free, being provided by the State and generous individuals.

The price of board, including washing, lights, fuel, room rent, clothes mending etc., is $8.00 per month.

Students are given an opportunity to work out an average of $3 per month, thus leaving only $5,00 to be paid cash. Some, work out one half their expenses.

Students' labor must be satisfactory in order to be accepted as

part payment for board bills. Students who are economical and willing to work, rarely fail to find a way to remain in school here. Whatever students do not work out must be paid in cash.

With a good outfit of clothing, $45 or $50 is sufficient cash to carry an able-bodied student through one school year (9months).

The rate of wages is according to the age of the student and the real value of his work, The arrangements are such that students lose nothing in their classes by working out a part of their expenses. At the end of each month a bill is given to every student showing what he may owe the school or what the school may owe him. Parents should require their children to send these bills home.

When students do not settle their accounts by the 15th of the month they are liable to be suspended from their r ecitations until they are paid.

Books must be paid for in cash. Money to pay board bills should be sent to the Principal or Treasurer directly and not to the student. Remittance may be made by money order, registered letter, check, or by express.

All non-resident students are expected to board at the school unless there is some good reason for their not doing so.

Students who need under-garments will find it to their advantage not to purchase such before coming here, as the institution will supply undergarments, etc., from the "Girls' Industrial Room" at about cost prices.

The school has adopted as a uniform for the young men, a dark blue suit, which will be furnished by the "Girls'Industrail Room" at bare cost of the material and manufacture. The cost of a uniform, (coat and pants) will be about $13.00.

ADVANTAGES.

The school is situated near the center of the State in one of its most healthful and cultivated towns and can be easily reached by

Railroad.

The institution is one mile from the center of the town and is situated on a farm of its own.

Those who wish to send their children to a place where they will not be surrounded by the temptations of a large city cannot find a better place than Tuskegee. No whiskey is sold in the town.

It is a quiet, retired town, just the place for study, is 40 miles east of Montgomery and 5 miles from Chehaw Station on the Western Railroad with which it is connected by the Tuskegee Railroad. While it enjoys all the advantages of access that a large city does, it is at the same time, far enough removed from the main line of travel to make it free from the danger of contagious diseases. The climate is so salubrious that it is very seldom the case that the health of students is not greatly improved after a short residence. The Western Union Telegraph Co., has an office in the town.

HOME TRAINING.

The Home Training that students receive here is one of the most valuable parts of their education. It is our intention to give special attention to the training of girls in matters pertaining to dress, health, etiquette, physical development, and general house-keeping. The girls receive the constant and strict care of the matron and other lady teachers and are not permitted to go off the school grounds without being accompanied by a teacher.

MILITARY DEPARTMENT.

The military system has been introduced for the reason that it cultivates habits of order, neatness and unquestioning obedience. Besides, the drill is good physical training, promoting, as it does, a graceful and manly bearing. Students are subject to the drill, guard duty and such other training may be thought best.

The Battalion is divided into four companies which are officered by students. The military feature does not interfere with the

performance of academic duties.

The uniform is the cheapest genteel suit that a student can wear. For cost of uniform see "Expenses."

LIBRARY AND READING ROOM.

There are three thousand volumes in the library and additions are constantly being made. It is accesible to all. The Reading Room is furnished with the best journals and periodicals.

Students are required to give items of current news every morning.

LITERARY SOCIETIES.

The young men and young women, each, have Literary Societies which hold weekly meetings, in which they have opportunities for extemporaneous speaking, and acquainting themselves with parliamentary practices.

REGULATIONS.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The use of intoxication drinks and tobacco, is forbidden.

Students are not permitted, while in school, to take part in political mass meetings or conventions.

Regular habits as to rest and recreation are required.

Students are liable to be dropped for inability to master their studies, irregular attendance, or failure in complying with the regulations of the school.

Expensive clothing are not necessary nor does the institution want students to wear anything except good plain clothing.

It is well for parents to correspond with the matron regarding clothes for their daughters.

Every girl should come provided with a pair of overshoes and a waterproof cloak.

WORK

Work is required of all for purposes of discipline and instruction, and of teaching the dignity of labor.

NIGHT SCHOOL

A few students, with no money, work all day and attend night school. In this way they earn money with which to pay their expenses in the day school the succeeding term. Those who enter as work students pledge themselves to work for a year from the time of their entrance. They are allowed a regular price for their work and are permitted to draw from the Treasury from $1.00 to $2000 permonth according to the amount they earn. The remainder of the monthly allowance is reserved be the Treasurer to meet their expenses of board, books, etc., when they join the day school.

Those leaving voluntarily or are discharged as unsatisfactory either in work or department forfeit three-fourths of their earnings what the school owes students for work is not transferable and is payable in schooling only.

Night students are taken on two months' trial to test their physical and mental ability. Those entering the Night Class are advised to bring a good outfit of clothing from home, and make arrangements with their friends to be supplied with clothing during the term.

What the night students earn during the year, added to their earnings while in the day school, and during the three months' vacation, ought to keep them in school for two years.

The object of the work class is to help those who belong to it, to secure an education, and not to make money.

Only able-bodied, capable young men and young women who are eager for an education, need apply for admission to the Night School.

There are hundreds of institutions North and South, to which students can go and receive extended mental training, but those where young men and women can learn a trade in addition to other training, are few. At present, the industries of the institution are farming, brick-making, carpentering, printing, black smithing, painting, stock and poultry raising, and house-keeping and sewing for girls.

To these, the institution, expects to add tin smithing, shoe-making, etc.

For the impetus given to the industrial department of the school, it is indebted chiefly to the " John F. Slater Fund."

STATEMENT

The Tuskegee Normal School was established by act of the legislature of Alabama, passed in 1880, and was opened in a church July 4th, 1881, with 30 students and 1 teacher.

In the same year that the school was opened, the present location (consisting then of one hundred acres of land and 3 small buildings) was paid for by the friends of the school outside of the State appropriation.

The corner stone of the large building, Porter Hall, was laid at the close of the first session, and the building was completed during the second session at a cost of $6,000.

The school is now in its seventh session and has 24 officers and teachers, and an enrollment of 394 students, representing nearly every county in Alabama, and 6 states.

The appropriation of $2,000 annually, made by the State legislature, at first, for the support of the school, was increased at the session of 1883 to $3,000annually.

The State suppropriation is used entirely to pay tuition.

For money for buildings, land, etc, the school looks to its friends North and South. The property is deeded to a Board of Trustees.

During the 7 years that the school has been in session, the following amounts have been collected:

For Building Fund	$18,250
For Farm	$1,500
For Student Aid	$310
For General Expenses	$32,250

For Furniture	$5000
For Special Uses	$3,350
From Peabody Fund	$1,700
From John F. Slater Fund	$4,400
From Students for Board (About)	$13,000
Total outside of State Appropriation	$76,060
State Appropriation 7 years	$19,000
Total with State Appropriation	$95,060

Including the donations of materials and the improvements made, it is safe to put the value of the property and cash in hand at $70,000.

The entire property is free from debt.

LAND.

The school has acquired by purchase and gift 600 acres of land, most of which is covered with trees valuable for timber and fuel.

BUILDINGS.

The school buildings are large and commodious and are well adapted for school purposes. "Alabama" and Armstrong Halls are of brick and are uded, respectively, as dormitories for the young women and young men. The students kitchens and dining room are in the basement of "Alabama" Hall.

The recitation rooms are in "Porter" Hall, a three story fram building.

IN GENERAL

The school has facilities for teaching instrumental music. Those desiring it, and who can afford it, will, be given instruction on the piano or organ.

The school is undenominational, but students are required to attend church and Sabbathe school. They are at liberty to choose their own place of worship.

A regular weekly prayer meeting is held which all are expected to attend.

Efforts are made to obtain schools for those students who are competent and wish to teach during the summer vacation.

County Superintendents wanting competent teachers, will be sure of securing them by corresponding with the Principal.

Calisthenics.

General Information

CALENDAR

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May.

Vacation is from the last Thursday in May to the first Monday of September. Students are expected to enter promptly at the beginning of the session and remain in school till its close.

Applicants for admission should be present for examination the first Monday in September.

By communicating with the Principal, those unable to be present at the opening examination, may have special arrangements made fortheir entrance.

Conditions of Admission

For entrance to the Junior Class applicants must pass a satisfactory examination in reading, writing and the fundamental rules of Arithmetic.

Students, able to read and write, and having some knowledge of numbers, but not able to pass the examination for the Junior Class, will be admitted to the Preparatory Class.

All applicants for admission must be at least fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character.

Expenses.

Tuition is free, being provided by the State and generous individuals.

The price of board including washing, lights, fuel, room rent, clothes mending, etc., is $8.00 per month.

Students are given an opportunity to work out $2 or $3 per month, thus leaving only $5.00 or $6.00 to be paid in cash. Some work out one half of their expenses.

Students' labor must be satisfactory in order to be accepted as part payment for board bills. Students who are economical and willing to work rarely fail to find a way to remain in school here. Whatever students do not work out must be paid in cash.

With a good outfit of clothing, $45 or $50 is sufficient cash to carry an able bodied student through one school year (9months)

The rate of wages is according to the age of the student and the real value of his work. The arrangements are such that students lose nothing in their classes by working out a part of their expenses. At the end of each month a bill is given to every student showing what he may owe the school or what the school may owe him. Parents should requre their children to send these bills.Home.

When students do not settle their accounts by the 15th of the month they are liable to be suspended from their recitations until they are paid.

Books must be paid for in cash. Money to pay board bills should be sent to the Principal or Treasurer directly, and not to the student. Remittance may be made by money order, registered letter, check, or by express.

All non-resicent students are expected to board at the school unless there is some good reason for their not doing so.

Students who need under-garments will find it to their advantage not to purchase such befor e coming here, as the institution will supply garments, etc., from the Girls' Industrial Room at about cost prices.

The school has adopted as a uniform for the young men a dark blue suit, which will be be furnished by the Girls' Industrial Room at bare cost

of the material and manufacture. The cost of a uniform, (coat and pants) will be about $13.80.

Advantages.

The school is situated near the center of the State in one of its most healthful and cultivated towns and can be easily reached by Railroad.

The institution is one mile from the center of the town and is situated on a farm of its own.

Those who wish to send their children to a place where they will not be surrounded by temptations of a large city cannot find a better place than Tuskegee. No whiskey is sold in the town.

It is a quiet, retired town, just the place for study, is 40 miles east of Montgomery and 5 miles from Chehaw Station on the Western Railroad with which it is connected by the Tuskegee Railroad. While it enjoys all the advantages of access that a large city does, it is, at the same time, far enough removed from the main life of travel to make it free from the danger of contagious diseases. The climate is so salubrious that it is very seldom the case that the health of students is not greatly improved after a hort residence. The Western Union Telegraph Co. has an office in the town.

Home Training.

The Home Training that students receive here is one of the most valuable parts of their education. It is our intention to give special attention to the training of girls in matters pertaining to dress, health, etiquette, physical development and general house-keeping. The girls receive the constant and strict care of the matron and other lady teachers and are not permitted to go off the school grounds without being accompanied by a teacher.

Military Department.

The Military system has been introduced for the reason that it cultivates habits of order, neatness and unquestioning obedience. Besides, the drill is good physical training, promoting, as it does a graceful and manly bearing. Students are subject to the drill, guard duty and such other training as may be thought best.

The battalion is divided into four companies which are officered by students. The military feature does not interfere with the performance of academic duties.

The uniform is the cheapest genteel suit that a student can wear. For cost of uniform see "Expenses."

Library and Reading Room

There are three thousand volumes in the library and additions are constantly being made. It is accessible to all. The Reading Room is furnished with the best journals and periodicals.

Students are required to give items of current news every morning.

Literary Societies.

The Young men and youn women, each, have Literary Societies which hold weekly meetings, in which they have opportunities for extemporaneous speaking, and acquainting themselves with parliamentary practices.

Regulations.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The use of intoxicating drinks and tobacco, is forbidden.

Students are not permitted, while in school, to take part in political mass meetings or conventions.

Regular habits as to rest and recreation are required.

Students are liable to be dropped for inability to master their studies, irregular attendance, or failure in complying with the regulations of the school.

Expensive clothing are not necessary nor does the institution waht students to wear anything except good plain clothing.

It is well for parents to correspond with the matron tregarding clothes for their daughters.

Every girl should some provided with a pair of overshoes and a water-proof cloak.

Work

Work is required of all for purposes of discipline and instruction, and of teaching the dignity of labor.

Night School.

A few students, with no money, work all day and attend night school. In this way they earn money with which to pay their expenses in the day school the succeeding term. Those who enter as work students, pledge themselves to work for a year or longer from the time of their entrance. They are allowed a regular price for their work and are permitted to draw from the Treasury from $1.00 to $2,00 per month according to the amount they earn.. The remainder os the monthly allowance is reserved by the Treasurer to meet the expenses of board and books when they join the day school.

Those who leave voluntarily or are discharged as unsatisfactory either in work or department forfeit three-forths of their earnings. What the school owes students for work is not transferable and is payable in schooling only.

Night students are taken on tow months' trail to test their physical and mental ability. Those entering the Night Class are advised to bring a good outfit of clothing from home, and make arrangements with their friends to be supplied with clothing during the term.

What the night students earn during the year, added to their earnings while in the day school, and during the three month's vacation,ought to

keep them in school for two years.

The object of the work class is to help those who belong to it, to secure an education, and not to make money.

Only able-bodied, capable young men and young women who are eager for an education, need apply for admission to the Night Schoo.

There are hundreds of institutions North and South, to which students can go and receive extended mental training, but those where young men and women can learn a trade in addition to other training, are few. At present, the industries of the institution are farming, brick-making, carpentering, printin, black-smithing, painting, stock and poultry raising, and house-keeping and sewing for girls.

To these the institution expects to add tin-smithing, shoemaking, etc.,

For the impetus given to the industrial department of the school it is indebted chiefly to the " John F. Slater Fund."

Statement

The Tuskegee Normal School was established by act of the legislature of Alabama, passed in 1880, and was opened in a church July 4th 1881, with 30 students and 1 teacher.

In the same year, that the school was opened, the present location (consisting then of one hundred acres of land and 3 small buildings) was paid for by the friends of the school outside of the State appropriation.

The corner stone of the large building, Porter Hall, was laid at the close of the first session, and the building was completed during the second session at a cost of $6,000.

The school is now in its eight session and has 28 officers and teachers and an enrollment of 399 students, representing nearly every county in Alabama, and 7 States.

The appropriation of $2,000 annually, made by the State Legislature , at

first, for the support of the school, was increased at the session of 1883 to $3,000 annually.

The State appropriation is used entirely to pay tuition.

For money for buildings, land, etc, the school looks to its friends North and South, The property is deeded to a Board of Trustees.

**** G E N E R A L I N F O R M A T I O N ****

Calendar.

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May.

Vacation is from the last Thursday in May to the first Monday in September. Students are expected to enter promptly at the beginning of the session and remain in school till its close.

Applicants for admission should be present for examination the first Monday in September.

By communicating with the Principal, those unable to be present at the opening examination, may have special arrangements made for their entrance.

Conditions of Admission.

For entrance to the Junior Class, applicants must pass a satisfactory examination in reading, writing, and the fundamental rules of arithmetic.

Students, able to read and write, and having some knowledge of numbers, but not able to pass the examination for the Junior Class, will be admitted to the Preparatory Class.

All applicants for admission must be at least fifteen years of age, and must pledge themselves to teach two years in the public schools of Alabama after they have become qualified, but they are not expected to teach without compensation; they must also furnish satisfactory proof of good moral character. Students are not taken for a shorter time than one month. Those who stay a shorter time will be charged for a full month.

Expenses.

Tuition is free, being provided by the State and generous individuals.

The price of board, including washing, lights, fuel, room rent, clothes mending etc., is $8.00 per month.

Students are given an opportunity to work out $2 or $3 per month, thus leaving only $5.00 or $6.00 to be paid in cash. Some work out one-half of their expenses. Students' labor must be satisfactory in order to be accepted as part payment for board bills. Those who are economical and willing to work rarely fail to find a way to remain in school here. Whatever students do not work out must be paid in cash.

With a good outfit of clothing, $ 45 or $50 is sufficient cash to carry an able-bodied student through one school year (9months.)

The rate of wages is according to the age of the student and the real value of his work. The arrangements are such that students lose nothing in their classes by working out a part of their expenses. At the end of each month a bill is given to every student showing what he may owe the school or what the school may owe him. Parents should require their children to send these bills home.

When students do not settle their accounts by the 15th of the month they are liable to be suspended from their recitations until they are paid.

Books must be paid for in cash. Money to pay board bills should be sent directly to the Principal or Treasurer and not to the student. Remittance may be made by money order, registered letter, check, or by express.

All non-resident students are expected to board at the school unless there is some good reason for their not doing so.

Students who need under-garments will find it to their advantage

to purchase such before coming here, as the institution will supply garments, etc., from the Girls' Industrial Room at bare cost of the material and manufacture. The cost of a uniform, (coat and pants) will be about $13.00.

Advantages.

The school is situated near the center of the State in one of its most beautiful and cultivated towns and can be easily reached by Railroad.

It is one mile form the center of the town and is situated on a farm of its own.

Those who wish to send their children to a place where they will not be surrounded by temptations of a large city cannot find a better place than Tuskegee. No whiskey is sold in the town. It is a quiet, retired town, just the place for study, is 40 miles east of Montgomery and 5 miles from Chehaw Station on the Western Railroad of /Alabama with which it is connected by the Tuskegee Railroad. While it enjoys all the advantages of access that a large city does, it is, at the same time, far enough removed from the main line of travel to make it free from the danger of contagious diseases. The climate is so salubrious that it is very seldom the case that the health of students is not greatly improved after a short residence. The Western Union Telegraph Co. has an office in the town.

Home Training.

The Home Training that students receive here is one of the most valuable parts of their education. It is the intention of the school to give special attention to the training of girls in matters pertaining to dress, health, etiquette, physical development and general house-keeping. The girl recieve the constant and strict care of the matron and other lady teachers and are not permitted to go off the school grounds without being accompanied by a teacher.

Military Department.

The military system has been introduced for the reason that it cultivates habits of order, neatness and unquestioning obedience. Besides, the drill is good physical training, promoting, as it does a graceful and manly bearing. Students are subject to the drill, guard duty and such other training as may be thought best.

The battalion is divided into five companies which are officered by students. The military feature does not interfere with the performance of academic duties.

The uniform is the cheapest genteel suit that a student can wear. For cost of uniform see "Expenses."

Library and Reading Room.

There are four thousand volumes in the library and additions are constantly being made. It is accessible to all. The reading room is furnished with the best journals and periodicals. Students are required to give items of current news every morning.

Literary Societies.

The young men and young women, both, have Literary Societies which hold weekly meetings, in which they have opportunities for extemporaneous speaking, and acquainting themselves with parliamentary practices.

Regulations.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The use of intoxicating drinks and tobacco, is forbidden.

Students are not permitted, while in school, to take part in political mass meetings or conventions.

Regular habits as to rest and recreation are required.

Students are liable to be dropped for inability to master their studies, irregular attendance, or failure in complying with the regulations of the school.

Expensive clothing are not necessary, nor does the institution want students to wear anything except good plain clothing.

It is well for parents to correspond with the matron regarding clothing for their daughters.

Every girl should come provided with a pair of overshoes and a waterproof cloak.

Work.

Work is required of all for purposes of discipline and instruction and of teaching the dignity of labor.

Night School.

A few students, with no money, work all day and attend night school. In this way they earn money with which to pay their expenses in the day school the succeeding term. Those who enter as work studnets, pledge themselves to work for a year or longer from the time of their entrance. They are allowed a regular price for their work which is held to their credit to meet the ecpense of board when they join the day school.

Those who leave voluntarily or are discharged as unsatisfactory either in work or deportment, forfeit four-fifths of their earnings, What the school owes students for work is not transferable and is payable in schooling only.

Night students are taken on two months' trial to test their physical and mental ability. Those entering the Night Class are advised to bring a good outfit of clothing from home, and make arrangements with their friends to be supplied with clothing during the term.

What night sthdents earn during the year, added to their earnings while in the day school, and during the three months' vacation, ought to keep them in school for two years.

The object of the work class is to help those who belong to it, to secure an education, and not to make money.

Only able-bodied, capable young men and young woman who are eager for an education, need apply for admission to the Night School.

There are hundreds of institutions North and South, to which students can go and receive extended mental training, but those where young men and women can learn a trade, in addition to other training, are few. At present, the industries of the institution are farming, brick-making, carpentry, printing, blacksmithing, tinsmithing, shoe-making, harness-making, painting, stock and poultry raising, and house-keeping and sewing for girls.

For the impetus given to the industrial department of the school, it is indebted chiefly to the "John F. Slater Fund."

Statement.

The Tuskegee Normal and Industrial Institute, was establishes by act of the legislature of Alabama, passed in 1880. and was opened in a church July 4, 1881, with 30 students and 1 teachers.

In the same year that the school was opened, the present location (consisting then of one hundred acres of land and 3 small buildings) was paid for by the friends of the school outside of the State appropriation.

The corner stone of the large building, Porter Hall, was laid at the close of the first session, and the building was completed during the second session at a cost of $6,000.

The school is now in its ninth session and has 28 officers and teachers, and an enrollment of 447 students, representing nearly every county in Alabama and 7 states.

The appropriation of $2,000 annually, made by the State legislature, at first, for the support of the school, was increased at the session of 1883 to $3,000 annually.

The State appropriation is used entirely to pay tuition.

For money for buildings, lands, etc., the school looks to its friends North and South. The property is deeded to a Board of Trustees.

During the 9 years that the school has been in session the following amounts have been collected and expended:

For Building	$20,350
For Farm	$2,500
For Tuition and general Expenses	$93,000
Total outside of State Appropriation	$115,850
State Appropriation 9 years	$25,000
Total with State Appropriation	$140,850

Including the donations of material and the improvements made, it is safe to put the value of the property and cash in hand at $100,000.

The entire property is free from debt.

Arithmetic—General review, 3 mos.
Literature—English and American, (Shaw), 6 mos.
Theory and Practice of Teaching—Work under teacher, and work in training school, 9 mos.
Philosophy—Mental (Haven) and Moral (Wayland,) 9 mos.
Physics—Avery) 7 mos.
Bookkeeping- Single Entry (Meservey's), 5 mos.
Exercises in Declamation and Essay Writing throughout the course.

*** INDUSTRIAL DEPARTMENT***

There are hundreds of institutions where colored students can go and receive mental training, but those where young men and women can learn a trade in addition to other training are very few. It is the aim of the Tuskegee Normal Institute to help, as far as its limited resources will permit, supply this great need of Industrial education among the colored youth.

The Agricultural and Mechanical work is carried on in connection with a four years' course of mental work designed to give a thorough English education. In all the Industrial work these objects are kept in view, viz:

1st, To teach the dignity of labor.

2nd To teach the students how to work, giving them a trade when best.

3rd To enable students to pay a portion of their expenses in labor.

At present the most developed of the industries are:

AGRICULTURE.

This department controls two farms of 680 and 800 acres respectively. The funds at command will not allow much out-lay in experimental farming. The special effort, therefore, is to give the students lessons in practical farming. The farms not only furnish valuable employment for students but supply largely the demands of the school.

BRICK-MAKING.

On the farm have been found beds of clay suitable for making brick. From these beds the school has been able to make brick enough to build four substantial buildings for school use. Thus it is that the school with its limited means is enabled to obtain much of its needed room. The bricks are made and laid by students, thus reducing the out-lay for buildings to the minimum.

CARPENTRY.

This department is one of the most developed of all the industries. The shop is furnished with several sets of tools. It is the aim of the managers to make the students efficient carpenters. The students are taught to do all kinds of work such as building cottages, fences, repairing buildings, making and repairing furniture, etc.,. Of the many buildings on the grounds most of the work has been done by boys of this department.

Painting is also taught in connection with this industry.

PRINTING.

A good printing office well furnished and under the management of a first-class printer, is another of the most fully developed industries. Here, as elsewhere, efficiency is the highest aim. The students are taught the various kinds of work needed in job and book printing. In this office are printed the Catalogues, "Southern Letter," Student" and much job work for the school and the surrounding country.

BLACKSMITHING.

As yet the Blacksmith and Wheelwright shops are combined; but there has just been completed a building for

blacksmithing and it is hoped that the wheelwright shop will soon be erected. This department does all the work for the school and farm, and much for the town and country. A nice buggy and several wagons and wheel-barrows have been made in this shop for school purposes.

TIN-SMITHING, SHOE-MAKING, HARNESS-MAKING

These three industries are the latest added. An efficient instructor has been employed and much needed and useful work is being done. Harness work for the neighborhood as well as for the school farms, is done here.

The repairing of shoes for the students and many new pairs have been made in the shoe shop.

All the roofing is done by students from the tin shop, besides a large quanity of tin-ware is furnished the boarding department.

SEWING.

A sewing room has been fitted up with apparatus nedessary for a large class of girls. Here, a class of girls is instructed daily in plain, substantial sewing. Besides those who sew every day a large number are instructed one day in each week. Much of the dress-making for the girls and and all the plain sewing of the school are done in this department.

In connection with this is a Sales Room in which the products of the sewing room are put for sale to the students.

LAUNDRY.

During the term a new, well equipped brick laundry has been built. Here, the girls are taught the art of washing and ironing after the most improved methods. As yet very little machinery has been introduced. The upper part of this build ing is used for dormitories for girls.

SAW-MILL.

One of the most useful of the industrial occupations carried on is that in connection with the saw-mill and other machinery. A great deal of the lumber for building is furnished this way. A large portion of the farm is covered with pine forest which supplies the mill with timber.

A planing mill is attached which dresses the lumber for use.

BEE CULTURE.

Bee culture has been begun with marked success and, it is hope, will soon prove profitable as well as instructive. The climate of Alabama is favorable for this industry.

TRAINING SCHOOL

This school is especially designed for observation and practice in primary teaching for those pursuing the Normal Course. Those unable to enter the C Preparatory Class are taught here. A new and commodious building has just been completed for this school.

***** GENERAL INFORMATION *****

The school opens the first Monday in September, and continues in session nine months, closing the last Thursday in May.

Vacation is from the last Thursday in May to the first Monday of September. Students are expected to enter promptly at the beginning of the session and remain in school till its close.

Applicants for admission should be present for examination the first Monday in September.

By communicating with the Principal, those unable to be present at the opening examination, may have special arrangements made for their entrance.

CONDITIONS OF ADMISSION.

For entrance to the Junior Class, applicants must have finished the preparatory course or its equivalent.

Students, able to read and write, and having some knowledge of numbers, but not able to pass the examination for the Junior Class, will be admitted to the Preparatory.

All applicants for admission must be at least fifteen years of age; they must also furnish satisfactory proof of good moral character. Students are not taken for a shorter time than one month. Those who stay a shorter time will be charged for a full month.

EXPENSES.

Tuition is free being provided by the State and generous individuals.

The price of board including washing, lights, fuel, room-rent, mending of clothes, etc., is $8.00 per month.

Students are given an opportunity to work out $2 or $3 per month, thus leaving only $5.00 or $6.00 to be paid in cash. Some work out one-half of their expenses. The labor of students must be satisfactory in order to be accepted as part payment for board bills. Those who are economical and willing to work rarely fail to find a way to remain in school here. Whatever students do not work out must be paid in cash.

With a good outfit of clothing, $45 or $50 is sufficient cash to carry an industrious student through one school year (9 months).

The rate of wages is according to the age of the student and the real value of his work. The arrangements are such that students lose nothing in their classes by working out a part of their expenses. At the end of each month a bill is given to every student showing what he may owe the school or what the school may owe him. Parnets should require their children to send these bills home.

When students do not settle their accounts by the 15th of the month they are liable to be suspended from their recitations until they are paid.

Books must be paid for in cash. Money to pay board bills should be sent directly to the Principal or Treasurer, and not to the student. Remittance may be made by money order, registered letter, check, or by express.

All non-resident students are expected to board at the school unless there is some good reason for their not doing so.

Students who need under-garments will find it to their advantage not to purchase such before coming here as the institution will supply garments, etc., from the Girls' Sewing Room at about cost prices.

The school has adopted as uniform for the young men, a dark blue suit--which will be furnished by the Girls Sewing Room at bare cost of the material and manufacture. The cost of a uniform (coat and pants) will be about $13.00

Each student is required to have a Bible and if one is not brought from home, a copy must be bought with other text-books.

ADVANTAGES.

The school situated near the center of the State in one of its most healthful and cultivated towns and can be easily reached by railroad.

It is one mile from the center of the town and situated on a farm of its own.

Those who wish to send their children to a place where they will not be surrounded by the temptations of a large city can not find better place than Tuskegee. No whiskey is sold in the town. It is a quiet, retired town, just the place for study, is 40 miles east of Montgomery and 5 miles from Chehaw Station on the Western Railroad of Alabama with which it is connected by the the Tuskegee Railroad. While it enjoys all the advantages of access that a large city does, it is, at the same time, far enough removed from the main line of travel to make it free from the danger of contagious diseased. The climate is so salubrious that it is very seldom the case that the health of students is not greatly improved after a short residence. The Western Union Telegraph Co. has an office in the town.

HOME TRAINING

The Home Training that students receive here is one of the most valuable parts of their education, It is the intention of the school to give special attention to the training of girls in matters pertaining to dress, health, etiquette, physical culture and general house-keeping. The girls receive the constant and strict care of the matron and the other lady teachers, and are not permitted to go off the school grounds without being accompanied by a teacher.

MILITARY DEPARTMENT.

The military system has been introduced for the reason that it cultivates habits of order, neatness and unquestioning obedience. Besides, the drill is good physical training, promoting, as it does, a graceful and manly bearing. Students are subject to the drill, guard duty and such other training as may be thought best.

The Battalion is divided into five companies which are officered by students. The military feature does not interfere with the performance of the academic duties.

The uniform is the cheapest, genteel suit that a student can wear. For cost of uniform see "Expenses."

LIBRARY AND READING ROOM.

There are four thousand volumes in the library and additions are conatantly being made. It is accessible to all. The Reading Room is furnished with the best journals and periodicals. Students are required to give items of current news every morning.

LITERARY SOCIETIES.

The young men and young women, both, have Literary Societies which hold weekly meetings, in which they have opportunities for extemporaneous speaking and acquainting themselves with parliamentary practices.

RELIGIOUS SOCIETIES.

There are among the students three religious societies,—The Young Men's Christian Association, Young People's Society of Christian Endeavor, and King's Daughters. Each of these societies has its weekly prayer meeting and does missionary work in the neighborhood.

REGULATIONS.

The rules governing the school aim to be those which best promote the welfare and happiness of all.

The demeriting system has been adopted by the school as the principal mode of discipline.

The use of intoxicating drinks and tobacco is strictly for bidden, Dice and card playing are positively prohibited.

Students are not permitted, while in school, to take part in political mass-meetings or conventions.

Regular habits as to rest and recreation are required.

Students are liable to be dropped for inability to master their studies, irregular attendance, or failure in complying with the regulations of the school.

Expensive clothing is not necessary, nor does the institution want students to wear anything except good plain clothing.

It is well for parents to correspond with the matron regarding clothing for their daughters.

Every young man must have a Uniform cap.

Every girl should come provided with a pair of overshoes and a water proff cloak.

Every student should come provided with table napkins.

No young man must leave the grounds without wearing his cap or some other part of his uniform.

WORK.

Work is required of all for purposes of discipline and instruction, and of teaching the dignity of labor.

NIGHT SCHOOL.

Many students, with no money, work all day and attend night school. In this way they earn money it which to pay their expenses in the day school the succeeding term. Those who enter as work students, pledge themselves to work for a year or longer from the time of their entrance. They are allowed a regular price for their work which is held to their credit to meet the expenses of board when they join the day school.

Those who leave voluntarily or are discharged as unsatisfactory either in work or deportment, forfeit four-fifth of their earnings. What the school owes students for work is not transferable and is payable in schooling only.

Night students are taken on two months' trial to test their physical and mental ability. Those entering the Night school are advised to bring a good outfit of clothing from home, and make arrangements with their friends to be supplied with clothing during the term.

What night students earn during the year, added to their earnings while in the day school, and during the three months' vacation, ought to keep them in school for two years.

The object of the work class is to help those who belong to it, to secure an education, and not to make money.

Only able-bodied, capable young men and young women who are eager for an education, need apply for admission to the Night School.

STATEMENT.

The Tuskegee Normal and Industrial Institute was established by act of the legislature of Alabama, passed in 1880 and was opened in a church July 4, 1881, with 30 students and one teacher.

In the same year that the school was opened, the present location (consisting of one hundred acres of land and 3 small buildings) was paid for by the friends of the school outside the State appropriation.

The corner stone of the large building Porter Hall, was laid at the close of the first session, and the building was completed during the second session at a cost of $6,000.

The school is now in its tenth session and has 31 officers and teachers, and, including the Training School, an enrollment of 731 students, representing nearly every county in Alabama and 13 states.

The appropriation of $2,000 annually made by the State legislature, at the first, for the support of the school, was increased by the session of 1883 to $3,000 annually.

The State appropriation is used entirely to pay tuition.

For money for buildings, land etc., the school looks to its friends North and South. The property is deeded to a Board of Trustees.

The school is undenominational, but its students are required to attend church and Sabbath school.

From the beginning of the institution up to the last school year the students have paid in, for board $28,887.99. and collections amounting to $146,156.80 have been made, making a total of $175, 144.79.

Including the donations of material and the improvements made, it is safe to put the value of the property and cash in hand at $125, 000.

The entire property is free of debt.

LAND

The school has acquired by purchase and gift 1,400 acres of land, much of which is covered with trees valuable for timber and fuel.

BUILDINGS.

The school buildings are large and commodious and are well adapted for school purposes. "Alabama" and "Armstrong" Halls are of brick and are used respectively as

dormitories for the young women and young men. The students' kitchen and dining room are in the basement of Alabama Hall".

The recitation rooms are in "Porter Hall, a three story frame building.

IN GENERAL

The school has facilities for teaching instrumental music. Those desiring it and who can afford it, will be given instruction on the piano or organ.

A regular weekly prayer meeting is held and all are expected to attend.

Efforts are made to obtain schools for those students who are competent and wish to teach during the summer vacation.

County Superintendents wanting competent teachers will be sure of securing them by corresponding with the Principal.

For further information: address the Principal:

B. T. Washington.
